Market Konstantin Wellner, 2015-03-03. In this study among camping tourists of all age groups between 19 and 86 years of age, Konstantin Wellner compares key characteristics regarding innovative behavior of different age groups. The focus of the analysis is on the so-called Silver Market segment: consumers of at least 55 years, which gains importance to the demographic shift. Generally, older users are still actively innovating, especially if it relates to age-specific improvements, e.g., comfort and compatibility to other equipment. Analysis by a Structural Equation Model showed that the most important determinant of innovative behavior for older users is technical expertise and that being relatively ahead of trends increases their dissatisfaction with existing products. Additional evidence was found that users with high use experience suffer from functional fixedness. The Complete Book of Volkswagen GTI Russell Hayes, 2025-10-28. Everyday Lifestyles and Sustainability Fabricio Chicca, Brenda Vale, Robert Vale, 2018-04-09. The impact of humanity on the earth overshoots the earth's bio capacity to supply humanity's needs, meaning that people are living off earth's capital rather than its income. However, not all countries are equal, and this book explores why apparently similar patterns of daily living can lead to larger and smaller environmental impacts. The contributors describe daily life in many different places in the world and then calculate the environmental impact of these ways of living from the perspective of ecological and carbon footprints. This leads to comparison and discussion of what living within the limits of the planet might mean. Current footprints for countries are derived from national statistics, and these hide the variety of impacts made by individual people and the choices they make in their daily lives. This book takes a bottom-up

approach by calculating the footprints of daily living The purpose is to show that small changes in behaviour now could avoid some very challenging problems in the future Offering a global perspective on the question of sustainable living this book will be of great interest to anyone with a concern for the future as well as students and researchers in environmental studies human geography and development studies
