Continued Violence and Troublesome Pasts Ville Kivimäki, Petri Karonen, 2017-05-23 In most European countries the horrific legacy of 1939 45 has made it quite difficult to remember the war with much glory Despite the Anglo American memory narrative of saving democracy from totalitarianism and the Soviet epic of the Great Patriotic War the fundamental experience of war for so many Europeans was that of immense personal losses and often meaningless hardships The anthology at hand focuses on these histories between the victors on the cases of Hungary Estonia Poland Austria Finland and Germany and on the respective often gendered experiences of defeat The book s chapters underline the asynchronous transition to peace in individual experiences when compared to the smooth timelines of national and international historiographies Furthermore it is important to note that instead of a linear chronology both personal and collective histories tend to return back to the moments of violence and loss thus forming continuous cycles of remembrance and forgetting Several of the authors also pay specific attention to the constructed and contested nature of national histories in these cycles The role of these in between countries and even more their peoples multifaceted experiences will add to the widening European history of the aftermath thereby challenging the conventional dichotomies and periodisations In the aftermath of the seventieth anniversary of 1945 it is still too early to regard the post war period as mere history the memory politics and rhetoric of the Second World War and its aftermath are again being used and abused to serve contemporary power politics in

Untimely Sacrifices Daena Aki Funahashi, 2023-04-15

Untimely Sacrifices questions why individuals may give their time and energy to the collective against their own self interest Turning to Finland where public health officials named occupational burnout as a new hazard of the new economy Daena Funahashi asks What moves people to work to the point of pathological stress Contrary to health experts who highlight the importance of self management and energetic conservation Funahashi questions the very economic premise of cognitive psychology that one could economize one's energy and thus save oneself By pitting anthropological takes on sacrifice next to the clinical discourses on pressure work and coping Funahashi offers ways to rethink what drives stress *Untimely Sacrifices* also provides a compelling critique of state welfare and political economy contesting the tendency to treat the gift economy as something separate from the force that makes redistributive mechanisms of state welfare work It is a book essential to those interested in how forces unassimilable to conventional economy come to matter in issues of labor stress and welfare
