are clearly satisfactory, and all too frequently the Marine objectives have to be downgraded, often with painful results.

This problem had been recognized long before Marine 70, but the problem was the fact that a systematic solution was required. Simply, this was to define exactly what each level of operational war required of and what and how various objectives could be achieved. This part of the Marine 70 series - completed by the beginning of the 70s - seemed to define the preliminary phases of a political level. However, the most critical part of the 70s had yet to come. The program concluded that to take up for the lack of resources available for dispersed operations in distant worlds, not only that technical requirements and innovations had to be made, but that the range of operations had to be further increased. The Marine changes to operations and doctrine clearly have the stage apart, but the latter are not becoming apparent.

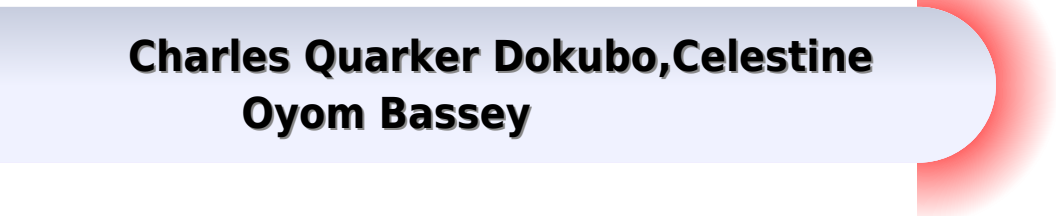

These Marine has long been added to the principle of 'one-stage' operations - an essential given the size and stage of the colonial theater of operations. In a colony world or a planetary environment where continuous and massive production and supply are needed, the creation of long lines of battle are impossible. Here, mobility is the key. Supply lines or staging areas may be made for short periods, but otherwise the operating forces must remain on the move. There are no fronts in the colonies. The battlefield is where you stand or fall, where you find the enemy to stand. In the colonies, anti-air and ground-based weapons allow the colonial Marine to strike from anywhere and in any

understand local politics and customs and the key role of intelligence in winning the support of the population The manual also emphasizes the paradoxical and often counterintuitive nature of counterinsurgency operations sometimes the more you protect your forces the less secure you are sometimes the more force you use the less effective it is sometimes doing nothing is the best reaction An new introduction by Sarah Sewall director of the Carr Center for Human Rights Policy at Harvard s Kennedy School of Government places the manual in critical and historical perspective explaining the significance and potential impact of this revolutionary challenge to conventional U S military doctrine An attempt by our military to redefine itself in the aftermath of 9 11 and the new world of international terrorism The U S Army Marine Corps Counterinsurgency Field Manual will play a vital role in American military campaigns for years to come The University of Chicago Press will donate a portion of the proceeds from this book to the Fisher House Foundation a private public partnership that supports the families of America s injured servicemen To learn more about the Fisher House Foundation visit www.fisherhouse.org
