High-skilled Migration Mathias Czaika, 2018 Political and scientific debates on migration policies have mostly focused on governments efforts to control or reduce low skilled asylum and irregular migration or to encourage the return migration of these categories Less research and constructive discourse has been conducted on the role and effectiveness of policies to attract or retain high skilled workers An improved

understanding of the drivers and dynamics of high skilled migration is essential for effective policy making as most highly developed and emerging economies experience growing shortages of high skilled labour supply in certain occupations and sectors and skilled immigration is often viewed as one way of addressing these. Simplistic assumptions that high skilled migrants are primarily in pursuit of higher wages raise the expectation that policies which open channels for high skilled immigration are generally successful. Although many countries have introduced policies aimed at attracting and facilitating the recruitment of high skilled workers not all recruitment efforts have had the desired effects and anecdotal evidence on the effectiveness of these programmes is rather mixed. The reason is that the rather narrow focus on migration policy coincides with a lack of systematic and rigorous consideration of other economic social and political drivers of migration which may be equally or sometimes even more important than migration policies per se. A better understanding of migration policies their making consequences and limitations requires a systematic knowledge of the broader economic social and political structures and their interaction in both origin and destination countries. This book enhances this vibrant field of social scientific enquiry by providing a systematic multidisciplinary and global analysis of policies driving international high skilled migration processes in their interaction with other migration drivers at the individual city national and international level.

South Africa Survey ,2003 Psychological Assessment in South Africa Sumaya Laher,Kate Cockcroft,2013-01-01

This book provides an overview of the research related to psychological assessment across South Africa. The thirty six chapters provide a combination of psychometric theory and practical assessment applications in order to combine the currently disparate research that has been conducted locally in this field. Existing South African texts on psychological assessment are predominantly academic textbooks that explain psychometric theory and provide brief descriptions of a few testing instruments. *Psychological Assessment in South Africa* provides in depth coverage of a range of areas within the broad field of psychological assessment including research conducted with various psychological instruments. The chapters critically interrogate the current Eurocentric and Western cultural hegemonic practices that dominate the field of psychological assessment. The book therefore has the potential to function both as an academic text for graduate students as well as a specialist resource for professionals including psychologists psychometrists remedial teachers and human resource practitioners.

Tyler Dickovick,2011-01-01 In the 1980s and 1990s much of the developing world experienced transitions to democracy accompanied by economic liberalization and decentralization of power to subnational governmental bodies The process of decentralization has been studied intensively but little attention has been paid so far to the recentralization that has occurred in some countries in the

past decade In this book J Tyler Dickovick seeks to illuminate how the processes of decentralization and recentralization are interrelated and what the dynamics of each is He argues that decentralization occurs as a result of the decline in the power of the presidency whereas recentralization occurs when the president resolves an extraordinary economic crisis The processes of decentralization and recentralization Dickovick further argues have the same dynamics whether they occur in federal or unitary states To test the theory Dickovick compares a strong federal system Brazil with a weak one South Africa and compares these in turn with two unitary regimes Peru and Senegal Decentralization and Recentralization in the Developing World provides a much more nuanced understanding of when and why decentralization and recentralization happen and what their importance is to intergovernmental shifts in power
