Bio- and MedTech Entrepreneurship Heidrun Flaadt Cervini, Jörg Dogwiler, 2020-07-21 The process of innovation in life science is capital intensive associated with a high risk as well as highly regulated and is therefore distinct from other types of innovation This book closes the educational gap in life science entrepreneurship and fills a market niche It allows you to understand manage and successfully lead the innovation process in life science Learn how to develop and successful market biomedical technology Increase the return of your investments in biomedical innovation Get ready for a new career in a life science start up Discover how to transfer a bio or medtech project from academia to industry Obtain a comprehensive overview of the innovation process in life science *Nordic Environmental Valuation Database*, 2007 *The Routledge*

International Handbook of Valuation and Society Anne Krüger, Thorsten Peetz, Hilmar Schaefer, 2024-10-15 The Routledge International Handbook of Valuation and Society builds on the growing research interest in practices of valuation throughout contemporary society providing an up to date overview of the different facets of research in the sociology of valuation The handbook is divided into five major sections with attention to the treatment of valuation in major areas of sociological theory as well as its key concepts discourses and approaches Part I Theoretical perspectives Part II Central valuation practices in societal spheres Part III Cross cutting valuation practices Part IV Valuation and societal change Part V Reflections Together the chapters in this book characterize distinctive practices of valuation across different societal spheres such as education and science arts and culture economic life the environment or digital culture and social media They also examine the role of valuation in contemporary society and consider the ways it effects social change This seminal handbook aims at taking stock of the development of the study of valuation with a selection of topics that are important for understanding core perspectives and developments as well as anticipating its future orientation It will appeal to scholars across the social sciences with interest in the ubiquity of the valuation practices and its effects on social life *Decision Options* Gill Eapen, 2009-06-01

Through theory and case studies this book details how uncertainty and flexibility can be evaluated to assist in making better investment decisions in companies It delivers an excellent balance of theory and practice in the area of investment decision making demonstrates how financial and real options are related and describes the theoretical underpinnings of both The author presents case studies from diverse industries including life sciences pharmaceuticals commodities energy technology manufacturing and financial services He also looks at how organizations can become successful using a holistic framework that integrates uncertainty and flexibility **Redefining Shareholder Value** Mariana Schmid, Milan Frankl, 2015-07-22

Measuring shareholder value has become crucial in the current economic environment especially following the consistent pressure from institutional shareholders on companies to create shareholder value in an adverse economic environment

Maximizing the company's value will make the company less appealing to hostile takeovers. Takeovers are a capital market mechanism designed to control the conflicts of interest between shareholders and managers of the company. In this study, the authors examine the best methods used in measuring shareholder value and explore the process of shareholder value creation in the years prior and following the creeping takeover of Ivanhoe Mines by Rio Tinto Plc. The study is based on data and ratio analytics from ThomsonONE Reuters information that is publicly available through press releases, analyst coverage, and financial news. It also includes an in-depth analysis of the creeping takeover of Ivanhoe Mines by Rio Tinto Plc.
