Data enthusiasts claim personal information that's obtained from the commercial internet including mobile platforms, social networks, cloud computing and connected devices will unlock path-breaking innovation including advanced data security. The only productive way forward is to get a grip on the key problems right now and change the conversation. That's exactly what Jules Polonetsky, Omer Tene and Evan Selinger do. They bring together diverse views from leading academics, business leaders and policymakers to discuss the opportunities and challenges of the new data economy.
