intermediate photographers how to take still images and record video with the RX100 VI and explains when and why to use the camera's many features. The book provides details about the camera's automatic and advanced shooting modes including burst shooting at rates as fast as 24 frames per second as well as its numerous menu options for shooting playback and setup. The book includes information about using Wi-Fi and Bluetooth connections for image transfer, remote control, and adding location information to images. The book has more than 500 color photographs or illustrations that help explain the camera's menus, shooting screens, and features. These images include examples of photographs taken using the RX100 VI's Scene mode with settings optimized for subjects such as landscapes, sunsets, portraits, low light, and action shots, and the Creative Style and Picture Effect menu options with settings that alter the appearance of images. The book also provides introductions to topics such as street photography, astrophotography, and digiscoping with photographic examples. The book includes a full discussion of the video features of the RX100 VI which can shoot HD and 4K ultra HD movies and which offers manual control of exposure and focus during movie recording. The book explains the camera's numerous features that are useful for professional level videography including Picture Profiles that allow adjustment of settings such as gamma curve, black level, knee, and detail. The book provides detailed information about recording 4K video to an external video recorder using the clean video output from the camera's HDMI port. In three appendices, the book discusses accessories for the RX100 VI including cases, power sources, grips, remote controls, and filter adapters, and includes a list of websites and other resources for further information. The book includes an appendix with quick tips on how to take advantage of the camera's features in the most efficient ways possible. This guide to the RX100 VI includes a detailed index so the reader can quickly find needed information about any particular feature or aspect of the camera.

[Content Syndication with RSS](#) Ben Hammersley, 2003. Originally developed by Netscape in 1999, RSS which can stand for RDF Site Summary, Rich Site Summary, or Really Simple Syndication, is an XML-based format that allows web developers to describe and syndicate web site content. Using RSS files allows developers to create a data feed that supplies headlines, links, and article summaries from a web site. Other sites can then incorporate these elements into their pages automatically. This text provides a comprehensive reference to the specifications and the tools that make syndication possible.
