environments and reroute perception into more malleable virtual platforms Is immersion just another name for enclosure In this groundbreaking analysis of virtual reality Paul Roquet uncovers how the technology is reshaping the politics of labor gender home and nation He examines how VR in Japan diverged from American militarism and techno utopian visions and became a tool for renegotiating personal space Individuals turned to the VR headset to immerse themselves in three dimensional worlds drawn from manga video games and genre literature The Japanese government promised VR operated robots would enable a new era of remote work targeting those who could not otherwise leave home Middle aged men and corporate brands used VR to reimagine themselves through the virtual bodies of anime styled teenage girls At a time when digital platforms continue to encroach on everyday life The Immersive Enclosure takes a critical look at these attempts to jettison existing social realities and offers a bold new approach for understanding the media environments to come *Hi-fi*

Techniques of Hearing Michael Schillmeier, Robert Stock, Beate Ochsner, 2022-10-21. Hearing health and technologies are entangled in multi-faceted ways. This edited volume addresses this complex relationship by arguing that modern hearing was and is increasingly linked to and mediated by technological innovations. By providing a set of original interdisciplinary investigations that shed new light on the history, theory and practices of hearing techniques, it is able to explore the heterogeneous entanglements of sound, hearing practices, technologies and health issues. As the first book to bring together historians, scholars from media studies, social sciences, cultural studies, acoustics and neuroscientists, the volume discusses modern technologies and their decisive impact on how normal hearing, enhanced and smart hearing as well as hearing impairment have been configured. It brings both new insights into the histories of hearing technologies as well as allowing us to better understand how enabling hearing technologies have currently been unfolding an increasingly hybrid ecology, engaging smart hearing devices and offering stress-free hearing and acoustic well-being in novel auditory environments. The volume will be of interest to all scholars and students of disability studies, sound studies, sociology of health and illness, medical history, health and society as well as those interested in the practices and techniques of self-monitored and smart hearing.
