**The City Shaped** Spiro Kostof,1999 The book is about the universal phenomenon of citymaking seen in a historical perspective how and why cities took the shape they did It focuses on a number of themes organic patterns the grid the city as a diagram the grand manner and the skyline and moves through time and place to interpret the hidden order inscribed in urban patterns The City Assembled Spiro Kostof,1992 **Culture, Urbanism and Planning** Manuel

Guardia,2016-05-13 The relationship between culture and urbanism has been the focus of much discussion and debate in recent years While globalisation tends towards a homogeneity successful global cities have a strong individual and particularly cultural identity The economic value of the culture of cities lies not only in the arts taking place there but also in the city s fabric its architecture and in its cultural heritage This volume brings together a team of leading specialists to examine the policies of image and city marketing which have developed over the past 15 years and whether these are a continuity of earlier strategies Featuring case studies which illustrate diverse perspectives on linking culture urbanism and history the book reviews heritage and planning culture looking at the experience of urbanism in the Old Historic City The book also assesses the increasingly important issue of urban images and their influence on planning strategies *The City Assembled* Spiro Kostof,1992 Kostof follows *The City Shaped* with a brilliant study of the component parts that make up urban life All cities consist of certain basic elements streets parks public places and boundaries and it is to these day to day pieces of urban experience that this book turns providing a fascinating understanding of walls fortifications placement of green space and the fringe areas where city and country meet Illustrations *The City Assembled* Spiro Kostof,Greg Castillo,1992 Spiro Kostof the renowned architectural historian and chronicler of urban form presents a universal history of the elements of cities streets public places urban divisions and the borders of city and countryside This is both an independent study and a companion volume to Professor Kostof s book *The City Shaped* which dealt with cities as complete entities Now he follows the evolution of their components and traces the story right up to the present showing how the issues remain fresh and engage with our own day often in unexpected ways He also discusses urban process the effect on cities of natural disasters such as the Great Fire of London and the Lisbon earthquake war and comprehensive redevelopment compared with traditional patterns of incremental growth and change This is at once an exercise in architectural and social history a case study for the present and a pointer for the future **Gridded Worlds: An Urban Anthology** Reuben

Rose-Redwood,Liora Bigon,2018-05-02 This book is the first edited collection to bring together classic and contemporary writings on the urban grid in a single volume The contributions showcased in this book examine the spatial histories of the grid from multiple perspectives in a variety of urban contexts They explore the grid as both an indigenous urban form and a colonial imposition a symbol of Confucian ideals and a spatial manifestation of the Protestant ethic a replicable model for real estate speculation within capitalist societies and a spatial framework for the design of socialist cities By examining the

entangled histories of the grid Gridded Worlds considers the variegated associations of gridded urban space with different political ideologies economic systems and cosmological orientations in comparative historical perspective In doing so this interdisciplinary anthology seeks to inspire new avenues of research on the past present and future of the gridded worlds of urban life Gridded Worlds is primarily tailored to scholars working in the fields of urban history world history urban historical geography architectural history urban design and the history of urban planning and it will also be of interest to art historians area studies scholars and the urban studies community more generally

*Remaking the City Street Grid* Fanis Grammenos, G.R. Lovegrove, 2015-03-07 Of all the elements of a neighborhood the pattern of streets and their infrastructure is the most enduring Given the 20th century's additions to the range of transportation means trains subways buses trucks bicycles motorbikes and cars all vying for space and effectiveness a fresh look at the streets is warranted This book contributes a new system of neighborhood design with a focus on contemporary planning priorities Drawing lessons from historic and current development it proposes a new pattern more fitting for modern culture addressing such issues as walkability mobility health safety security cost and greenhouse gas emissions Case studies of national and international neighborhoods and districts based on the new network model demonstrate its application in real world situations Instructors considering this book for use in a course may request an examination copy here

**Habsburg Lemberg** Markian Prokopovych, 2009 When Austria annexed Galicia during the first partition of Poland in 1772 the province's capital Lemberg was a decaying Baroque town By the outbreak of the First World War in 1914 Lemberg had become a booming city with a modern urban and at the same time distinctly Habsburg flavor In the process of the long nineteenth century both Lemberg's appearance and the use of public space changed remarkably The city center was transformed into a showcase of modernity and a site of conflicting symbolic representations while other areas were left decrepit overcrowded and neglected Habsburg Lemberg Architecture Public Space and Politics in the Galician Capital 1772 1914 reveals that behind a variety of national and positivist historical narratives of Lemberg and of its architecture there always existed a city that was labeled cosmopolitan yet provincial and a Vienna but still of the East Buildings streets parks and monuments became part and parcel of a complex set of culturally driven politics

Flesh and Stone: The Body and the City in Western Civilization Richard Sennett, 1996-03-17 This vivid history of the city in Western

civilization tells the story of urban life through bodily experience *Flesh and Stone* is the story of the deepest parts of life how women and men moved in public and private spaces what they saw and heard the smells that assailed them where they ate how they dressed the mores of bathing and of making love all in the architecture of stone and space from ancient Athens to modern New York Early in *Flesh and Stone* Richard Sennett probes the ways in which the ancient Athenians experienced nakedness and the relation of nakedness to the shape of the ancient city its troubled politics and the inequalities between men and women The story then moves to Rome in the time of the Emperor Hadrian exploring Roman beliefs in the geometrical perfection of the body The second part of the book examines how Christian beliefs about the body related to the Christian city the Venetian ghetto cloisters and markets in Paris The final part of *Flesh and Stone* deals with what happened to urban space as modern scientific understanding of the body cut free from pagan and Christian beliefs *Flesh and Stone* makes sense of our constantly evolving urban living spaces helping us to build a common home for the increased diversity of bodies that make up the modern city

**Designing Cities** Leonhard Schenk, 2023-02-20 Manual for Urban Design Second and revised edition of the successful edition with new projects Urban design is based on planning and design principles that need to meet functional demands on the one hand but on the other hand bring the design elements together into a distinctive whole The basic compositional principles are for the most part timeless *Designing Cities* examines the most important design and presentation principles of urban design using historical examples and contemporary international competition entries designed by practices including Foster Partners KCAP Architects Planners MVRDV and OMA At the core of the publication is the question of how the projects were designed and what methods and tools were available to the designer such as parametric design in which variable parameters automatically influence the design and provide a range of possible solutions Tools for urban design Current projects and award winning competition entries by renowned international practices A textbook for students and a practical design aid for practicing architects and planners

*Designing Urban Transformation* Aseem Inam, 2013-10-23 While designers possess the creative capabilities of shaping cities their often singular obsession with form and aesthetics actually reduces their effectiveness as they are at the mercy of more powerful generators of urban form In response to this paradox *Designing Urban Transformation* addresses the incredible potential of urban practice to radically change cities for the better The book focuses on a powerful question What can urbanism be by arguing that the most significant transformations occur by fundamentally rethinking concepts practices and outcomes Drawing inspiration from the philosophical movement known as Pragmatism the book proposes three conceptual shifts for transformative urban practice a beyond material objects city as flux b beyond intentions consequences of design and c beyond practice urbanism as creative political act Pragmatism encourages us to consider how we can make deeper and more systemic changes and how urbanism itself can be a design strategy for such transformations To illuminate how these conceptual shifts operate in vastly different contexts through analysis of transformative urban initiatives and projects in Belo Horizonte Boston Cairo Karachi Los

Angeles New Delhi and Paris The book is a rare integration of theory and practice that proposes essential ways of rethinking city design and building processes while drawing critical lessons from actual examples of such processes The Image Of An Ottoman City Heghnar Zeitlian Watenpaugh,2004 This urban and architectural study of Aleppo reconstructs the city's evolution over the first two centuries of Ottoman rule and proposes a new model for the understanding of the reception and adaptation of imperial forms institutions and norms in a provincial setting Riyadh Yasser Elsheshtawy,2021-09-27 Riyadh has set its sights on becoming a world city befitting the twenty first century To that end it has embarked on a massive construction drive evidenced in the proliferation of proposals for high end districts giga developments and elaborate infrastructures An urban vision seemingly dedicated to attracting global capital Yet such a narrative can be misleading A humanization programme initiated during the tenure of its former mayor Abdulaziz bin Ayyaf has complemented the city's rapid rise by providing spaces catering for the everyday needs of its inhabitants Yasser Elsheshtawy in this richly illustrated book targets these people centred settings It is a compelling counter narrative interweaving critical theoretical insights personal observations and serendipitous encounters He deftly demonstrates how Riyadh thrives through the actions of its people As the world moves towards an urban model that is resilient and humane the humanizing efforts of an Arab city are worthy of our attention Riyadh's premise is perhaps best captured in the cover image depicting the desert riverbed of Wadi Sulai filled with rainwater making its way towards the Saudi capital Along its banks there will be dedicated public pathways and urban parks It is a vision of an urbanity where both the spectacular and the everyday coexist A city that is not just dedicated to the few but one that serves the many *Function-Based Spatiality and the Development of Korean Communities in Japan* David Rands,2014-05-21 Function Based Spatiality and the Development of Korean Communities in Japan utilizes the theoretical model of complex adaptive systems and introduces the concept of function based spatiality to investigate the roles of the urban environments of Tokyo and Osaka in the development of Korean communities in Japan Analysis of distinct Korean communities allows for the examination of urban factors of each city which contributed to the patterns of Korean immigration and community formation By utilizing a comparative narrative of the two cities distinctions between the organic growth of Osaka and the planned city of Tokyo are illuminated Additionally the discussion utilizes the concept of function based spatiality to show how each city interacted with its surrounding regional national and global spheres The functions of Tokyo as a gateway to Western modernization and center of the Japanese state shaped the interactions with Korean immigrants Likewise Osaka's functions as a center of mercantilism and second city played a large role in how Koreans were incorporated into the urban ethnoscape Taken together these two examples provide insight to the dynamics of urban systems on the development of immigrant communities Safavid Persia in the Age of Empires Charles Melville,2021-02-25 The sixteenth and seventeenth centuries saw the establishment of the new Safavid regime in Iran Along with reuniting the Persian lands under one rule the Safavids initiated the radical transformation of the religious landscape by

introducing Imami Shi'ism as the official state faith and in this as in other ways laying the foundations of Iran's modern identity. In this book leading scholars of Iranian history, culture and politics examine the meaning of the idea of Iran in the Safavid period by examining contemporary experiences of both insiders and outsiders, asking how modern scholarship defines the distinctive features of the age. While sometimes viewed as a period of decline from the high points of classical Persian literature and the visual arts of preceding centuries, the chapters of this book demonstrate that the Safavid era was nevertheless a period of great literary and artistic activity in the realms of both secular and theological endeavour. With the establishment of comparable polities across western, southern and central Asia at broadly the same time, the book explores some of the literary and political interactions with Iran's Ottoman, Mughal and Uzbek neighbours. As the volume and frequency of European merchants and diplomats visiting Safavid Persia increased, especially in the seventeenth century, and as more Iranians recorded their own travel experiences to surrounding Muslim lands, the Safavid period is the first in which we can document and explore the contours of Iran's place in an expanding world and gain insights into how Iranians saw themselves and others saw them.

*The Guarded Age* David J. Betz, 2023-10-25. The fall of the Berlin Wall in 1989 came to symbolize the dawn of a new era of openness and connectivity. Yet today the world is ever more divided, demarcated and quite literally fortified. We are living in a guarded age. Why and how has this happened? Where will it take us? In this book David J. Betz explores the expansion of fortified physical infrastructure at every level of the global political economy. In cities where security is increasingly designed into public buildings and spaces as they are reshaped to mitigate mass terror attacks. Within corporations who are burying their electronic assets in deep underground caverns and behind the leaded walls of ex-nuclear war bunkers against a range of threats and feared contingencies. In many urban areas where the default condition of civil life is to be walled, gated, watched and guarded. Year after year, hundreds of miles of linear obstacles, walls, ditches and watchtowers are added to national borders. Practically everywhere you look, there are signs of innovative fortification, often designed to be overlooked. *The Guarded Age* reveals the barriers which most have observed but few until reading this book have truly seen.

**The Lives of a Roman Neighborhood** Paul W. Jacobs, II, Paul W. Jacobs (II), 2022-12. Takes one of the world's longest continuously occupied urban neighborhoods and explores the trace of early development on the future space.

**Tracing the Jerusalem Code** Eivor Andersen Oftestad, Joar Haga, 2021-04-19. With the aim to write the history of Christianity in Scandinavia with Jerusalem as a lens, this book investigates the image or rather the imagination of Jerusalem in the religious, political and artistic cultures of Scandinavia through most of the second millennium. Jerusalem is conceived as a code in this volume, focussing on Jerusalem's impact on Protestantism and Christianity in Early Modern Scandinavia. *Tracing the Jerusalem Code* in three volumes: Volume 1: The Holy City: Christian Cultures in Medieval Scandinavia ca. 1100-1536; Volume 2: The Chosen People: Christian Cultures in Early Modern Scandinavia 1536-ca. 1750; Volume 3: The Promised Land: Christian Cultures in Modern Scandinavia ca. 1750-ca. 1920.
