Spontaneous Activity In Education:

Spontaneous Activity In Education Maria Montessori, 2023-04-30 *Spontaneous Activity in Education* is a book written by Maria Montessori the founder of the Montessori method of education. In this book Montessori discusses the importance of children's natural desire to learn and how it can be fostered through the creation of a carefully prepared environment. She argues that children are capable of directing their own learning and that teachers should act as facilitators rather than direct instructors. Montessori believes that by following the child's lead and observing their spontaneous activity, educators can better understand the child's developmental needs and provide appropriate materials and activities to support their learning. This book is considered a foundational work in Montessori education and continues to be widely read and studied by educators and parents around the world. Montessori, 2023-02-14 This volume is Dr Maria Montessori's study of education with explanations of her philosophy of teaching and experimental scientific approach. Dr Maria Montessori's alternative method to early years education is based on the natural development of children and encourages hands-on learning with access to the natural world. She shares her views on children's imagination, intelligence, and behaviour while recommending the ideal learning environment and teaching exercises for the Montessori method. The chapters featured in this volume include: A Survey of the Child's Life, A Survey of Modern Education, My Contribution to Experimental Science, The Preparation of the Teacher, Environment, Attention, Will, Intelligence, Imagination. **Spontaneous Activity in Education** Maria Montessori, 2010-09-09

Spontaneous Activity in Education By Maria Montessori months after birth at a period of life when the nervous system is not completely developed and it is impossible for the infant to coordinate its movements, mothers wasted several half hours of the day teaching baby to walk.
