The moving body pervasively occupied by fitness activities intense training and dieting regimes recreational practices and high profile sporting mega events holds a vital function in contemporary society As the body moves as it performs sweats runs and jumps it sets in motion an intricate web of scientific rationalities spatial arrangements corporate imperatives and identity politics i.e. politics of gender race social class etc It represents vitality in its productive and physiological capacities it drives a complex economy of experiences and products and it is a meaningful site of cultural identities and politics

Contributors to *Sport Physical Culture and the Moving Body* work from a simple premise as it moves the material body matters Adding to the burgeoning fields of sport studies and body studies the works featured here draw upon the traditions of feminist theory posthumanism actor network theory and new materialism to reposition the physical moving body as crucial to the cultural political environmental and economic systems that it constitutes and within which is constituted Once assembled the book presents a

study of bodies in motion made to move in contexts where technique performance speed strength and vitality not only define the conduct therein but provide the very reason for the body's being within those economies and environments. In so doing the contributors look to how the body moving for and about rational systems of science medicine markets and geopolitics shapes the social and material world in important and unexpected ways. In *Sport Physical Culture and the Moving Body* contributors explore the extent to which the body when moving about both ostensibly active body spaces i.e. the gymnasium the ball field exercise laboratory the track or running trail the beach or the sport stadium and those places less often connected to physical activity i.e. the home the street the classroom the automobile is bounded to technologies of life and living and to the political arrangements that seek to capitalize upon such frames of biological vitality. To do so the authors problematize the rise of active body science i.e. kinesiology sport and exercise sciences performance biotechnology and the effects these scientific interventions have on embodied lived experience. Contributors to *Sport Physical Culture and the Moving Body* will be engaging a range of new and emerging theoretical perspectives including new materialist political ecology developmental systems theory and new material feminist approaches to examine the actors and assemblages of movement based material political and economic production. In so doing contributors will vividly and powerfully illustrate the extent to which a focus on the fleshed body and its material conditions can bring forth new insights or ontological and epistemological innovation to the sociology of sport and physical activity. They will also explore the agency of the body as and amongst things. Such a performative materialist approach explicates how complex assemblages of sport and physical activity bringing into association everything from muscle fibers and dietary proteins to stadium concrete or regional aquifers are not only meaningful but ecological. By focusing on the confluence of agential materialities disciplinary technologies vibrant assemblages speculative realities and vital performativities *Sport Physical Culture and the Moving Body* promises to offer a groundbreaking departure from representationalist tendencies and orthodoxies brought about by the cultural turn in sport and physical cultural studies. It brings the moving body and its physics back into focus recentering moving flesh and bones as locus of social order environmental change and the global political economy.
