Storied Health and Illness Jill Yamasaki, Patricia Geist-Martin, Barbara F. Sharf, 2016-07-01 Health and illness are storied experiences that necessarily entail personal cultural and political complexities For all of us communicating about health and illness requires a continuous negotiation of these complexities and a delicate balance between what we learn about the biology of disease from providers and our own very personal subjective experiences of being ill Storied Health and Illness brings together dozens of noteworthy scholars both established and emerging in a provocative collection that embraces narrative ways of knowing to think about analyze and reconsider our own and others health beliefs behaviors

and communication Comprehensive content reflects the editors substantial research in integrative health narrative care and innovative ways of improving well being and quality of life in personal relationships healthcare the workplace and community settings Unique narrative approaches to the study of health communication include 14 chapters written by 22 contributors who use engaging stories from their own research or personal experience to introduce and ground foundational communication concepts in healthcare health promotion community support organizational wellness and other health related sites of interest Compelling stories of individuals living with the inherent challenges and unexpected opportunities of mental illness addiction aging cancer dialysis sexual harassment miscarriage obesity alopecia breastfeeding health threats to immigrant workers developmental differences and youth gun violence 36 Health Communication in Action HCIA sidebars that highlight applied research of innovative health communication scholars in their own words and then prompt readers to think more deeply about their own perspectives and experiences Theorizing Practice boxes that encourage readers to reflect on stories that describe significant experiences in their own and others lives as they consider assumptions and enlarge their viewpoints in previously unimagined ways

Exercised Daniel E. Lieberman, 2021-12-07 If exercise is healthy so good for you why do many people dislike or avoid it These engaging stories and explanations will revolutionize the way you think about exercising not to mention sitting sleeping sprinting weight lifting playing fighting walking jogging and even dancing Strikes a perfect balance of scholarship wit and enthusiasm Bill Bryson New York Times best selling author of The Body If we are born to walk and run why do most of us take it easy whenever possible Does running ruin your knees Should we do weights cardio or high intensity training Is sitting really the new smoking Can you lose weight by walking And how do we make sense of the conflicting anxiety inducing information about rest physical activity and exercise with which we are bombarded In this myth busting book Daniel Lieberman professor of human evolutionary biology at Harvard University and a pioneering researcher on the evolution of human physical activity tells the story of how we never evolved to exercise to do voluntary physical activity for the sake of health Using his own research and experiences throughout the world Lieberman recounts without jargon how and why humans evolved to walk run dig and do other necessary and rewarding physical activities while avoiding needless exertion Exercised is entertaining and enlightening but also constructive As our increasingly sedentary lifestyles have contributed to skyrocketing rates of obesity and diseases such as diabetes Lieberman audaciously argues that to become more active we need to do more than medicalize and commodify exercise Drawing on insights from evolutionary biology and anthropology Lieberman suggests how we can make exercise more enjoyable rather than shaming and blaming people for avoiding it He also tackles the question of whether you can exercise too much even as he explains why exercise can reduce our vulnerability to the diseases mostly likely to make us sick and kill us

Defy Aging Beth Bennett, 2021-10-15 Shows why and how the body deteriorates as life goes on and offers an easy read overview of new solutions coming out of current studies of aging Wrinkles and gray hairs and misplaced keys the obvious signs of getting

older Surprisingly all of the miniscule events in our cells and organs that are responsible for aging begin their deterioration in our third decade This book explains what is going on inside cells and organs that result in the outward appearances of aging Readers will discover what causes skin to sag hair to turn gray blood vessels to stiffen and other mostly unwelcome events Finally and probably most importantly the reader will be introduced to what can be done to stop or reverse this process Beth Bennett provides an easy to read introduction to the science of aging why and how the body deteriorates She uses real world analogies to explain the chemical and cellular processes taking place in the body along with newly discovered solutions emerging from basic research labs Bennett explores the effects of aging in body systems that are important to all of us as we age skin muscle bone heart and brain In each of these body components Bennett connects novel science based interventions with lifestyle modifications that improve and extend health as opposed to simply lengthening life

Methuselah's Zoo Steven N. Austad,2023-08-15 Stories of long lived animal species from thousand year old tubeworms to 400 year old sharks and what they might teach us about human health and longevity Opossums in the wild don t make it to the age of three our pet cats can live for a decade and a half cicadas live for seventeen years spending most of them underground Whales however can live for two centuries and tubeworms for several millennia Meanwhile human life expectancy tops out around the mid eighties with some outliers living past 100 or even 110 Is there anything humans can learn from the exceptional longevity of some animals in the wild In Methuselah's Zoo Steven Austad tells the stories of some extraordinary animals considering why for example animal species that fly live longer than earthbound species and why animals found in the ocean live longest of all Austad the leading authority on longevity in animals argues that the best way we will learn from these long lived animals is by studying them in the wild Accordingly he proceeds habitat by habitat examining animals that spend most of their lives in the air comparing insects birds and bats animals that live on and under the ground from mole rats to elephants and animals that live in the sea including quahogs carp and dolphins Humans have dramatically increased their lifespan with only a limited increase in healthspan we re more and more prone to diseases as we grow older By contrast these species have successfully avoided both environmental hazards and the depredations of aging Can we be more like them
