By applying cultural historical activity theory and expansive learning theory to educational research this volume illuminates new forms of educational activities as collaborative interventions in schools and communities where learners and practitioners generate expansive learning so that they can collectively transform their activities and expand their agency for themselves It covers four cases of activity theoretical formative intervention studies conducted in Japan which are related to fostering children s expansive learning in classroom lessons teachers as collaborative change agents in redesigning schools expanding the school activity from below and emerging knotworking agency in community based disaster prevention learning This book employs activity theory as a general theoretical framework of human learning and development to connect focal data from empirical and interventional studies on real human learning in specific educational settings in Japan In this way the book illustrates how the general theoretical framework could be used to understand a specific socio cultural milieu that is the Japanese context It also shows the universal relevance of the Japanese context of educational activity on broader international research analyzing concrete empirical data from specific settings in Japan In conclusion this book creates new understanding and develops a cohesive framework of the agentic and hybrid nature of educational activities as collaborative interventions in the expansion of learning **Fluency Doesn't Just Happen with Addition and Subtraction** Nicki

Newton,Ann Elise Record,Alison J. Mello,2019-10-28 Fluency in math doesn t just happen It is a well planned journey In this

book you'll find practical strategies and activities for teaching your elementary students basic addition and subtraction facts. The authors lay out the basic framework for building math fluency using a cycle of engagement: concrete, pictorial, abstract, and provide a multitude of examples illustrating the strategies in action. You'll learn how to help students to model their thinking with a variety of tools, keep students engaged through games, poems, songs, and technology, assess student development to facilitate active and continuous learning, implement distributed practices throughout the year, boost parental involvement so that students remain encouraged even as material becomes more complex. A final chapter devoted to action plans will help you put these strategies into practice in your classroom right away. Most importantly, you'll open the door to deep and lasting math fluency.

Nurturing Your Child's Math and Literacy in Pre-K-Fifth Grade Mary Mueller, Alisa Hindin, 2016-11-23

With recent changes in the curriculum and standards in language arts and mathematics, parents often are challenged to find ways to help their children be successful in their learning endeavors. While parents want to be involved in their children's education, they are often unsure of their role in their children's learning and the best ways to help their children to succeed academically. Moreover, with the changes in how math and literacy are being taught, parents often struggle with helping even first-grade children with their homework. In this book, we set out to alleviate this struggle by offering parents a resource they can use to navigate their child's education, communicate with teachers, and support their children in learning mathematics and literacy. After providing an overview of the current educational climate and tips for communication with teachers, we share strategies and suggestions parents can use to assist their children in language arts and mathematics. We provide detailed descriptions of activities, games, books, and conversations that connect with what children will be learning at each grade level.

Managing the New Tools in K-12 Teaching and Learning Jerome A. Schulz, 2018-02-02

Managing the New Tools in K-12 Teaching and Learning: How Technology Can Enable School Improvement is about how to manage technology for

learning at the district and school levels It provides an overview of the components of learning technology these include student devices networking software productivity toolkits electronic curricula and resources and data system infrastructure And it discusses how we can manage our technology efforts more effectively to help our students attain the benefits of this technology The book concludes with case studies of how this is being done at pioneering districts We are now at a tipping point in implementing learning technology on a larger scale This is happening very quickly Historically learning technology was driven by a strategy of technology integration where we called on individual teachers to each determine how to use technology in their classes and make changes in their own ways of working But to successfully implement technology on the scale we need requires top down as well as bottom up efforts Managing the New Tools in K 12 Teaching and Learning focuses on how districts and schools can now use technology to bring about the big improvements in learning we are all striving for
