Split Decision The Hybrid Series Book 1

Dean Murray

Split Decision The Hybrid Series Book 1:

Split Decisions Janet Halley, 2008-04-01 Is it time to take a break from feminism In this pathbreaking book Janet Halley reassesses the place of feminism in the law and politics of sexuality She argues that sexuality involves deeply contested and clashing realities and interests and that feminism helps us understand only some of them To see crucial dimensions of sexuality that feminism does not reveal the interests of gays and lesbians to be sure but also those of men and of constituencies and values beyond the realm of sex and gender we might need to take a break from feminism Halley also invites feminism to abandon its uncritical relationship to its own power Feminists are in many areas of social and political life partners in governance To govern responsibly even on behalf of women Halley urges feminists should try taking a break from their own presuppositions Halley offers a genealogy of various feminisms and of gay queer and trans theories as they split from each other in the United States during the 1980s and 1990s All these incommensurate theories she argues enrich thinking on the left not despite their break from each other but because of it She concludes by examining legal cases to show how taking a break from feminism can change your very perceptions of what is at stake in a decision and liberate you to decide it anew

The Dark Reflections Series: Books 1-3 Dean Murray, 2015-03-03 As the heir to the largest shape shifter pack in North America Alec Graves has inherited a savage dangerous life If he can successfully take over his father's pack Alec will finally have a chance to make changes for the better but he wouldn't be the first person to be corrupted by that kind of power Human teenager Adri Paige is only days away from manifesting a supernatural ability that is as powerful as it is terrifying Her only hope of survival lies in mastering her gift before it lures dark forces into her life Separately Alec and Adri have no chance of seeing another year Together they just might be able to save the world This omnibus edition includes the first three novels in the popular Dark Reflections Series which has received more than 300 4 5 star reviews and is nearly 800 pages of action danger and romance set in one of the richest most complex worlds in the genre This Bundle includes Bound The only thing worse than having no family at all is having a family that is out to hurt you That would all be bad enough for a normal 17 year old but it's even worse for Alec Graves A shape shifter's pack his family is the only thing stopping the other preternatural creatures out there from killing them Alec's pack isn't just neglectful he's pretty sure that his father wants him dead Alec is about to be sent to the front lines of a war between his people and everything else that goes bump in the night His only chance of survival is to convince everyone around him that he's the perfect soldier but there are lines that Alec won't cross not for any price Hunted The Perfect Weapon Adri Paige can visit people inside of their dreams where they are defenseless The Ultimate Spy Adri's power lets her ferret out anyone's secrets and even influence their waking actions The World's Biggest Prize Adri's power comes with a price Dark forces hunt her hoping to bend her gifts to their purposes The Real Problem Adri needs to make it through high school without letting anyone around her figure out her true capabilities all while crushing on a guy she knows is probably trouble Ambushed Adriana Paige has survived not one but

two vampire attacks in less than twenty four hours and unless she's able to master her ability to share other people's dreams the attacks are only going to get worse Taggart has promised to train Adri but he's got even more enemies than she does and there's no guarantee that he'll be able to keep her from being caught in the crossfire More than anything else Adri wants to talk to shape shifter Alec Graves but he's gone strangely silent There's no way for Adri to know if that's because he's no longer interested in her or if it's simply because he's still on the run from his ruthless father Kaleb As enemies both new and old start closing in on Adri she's starting to worry that she might be forced into choosing between Taggart the man who saved her life and Alec the guy to whom she feels inexplicably connected

Publisher's Note Dean Murray's ongoing Reflection Series has been a stunning success with more than half a million copies in circulation and a rich complex world where choices right or wrong have real profound consequences Unsatisfied with the restrictions imposed on him by writing inside of the conventional series structure Dean has returned to Sanctuary and the characters so many fans have fallen in love with The Dark Reflections Series is an alternate timeline set in the same world and featuring many of the same characters as the Reflections Series but with a profoundly different backstory

Stream Data Mining: Algorithms and Their Probabilistic Properties Leszek Rutkowski, Maciej Jaworski, Piotr Duda, 2019-03-16 This book presents a unique approach to stream data mining Unlike the vast majority of previous approaches which are largely based on heuristics it highlights methods and algorithms that are mathematically justified First it describes how to adapt static decision trees to accommodate data streams in this regard new splitting criteria are developed to guarantee that they are asymptotically equivalent to the classical batch tree Moreover new decision trees are designed leading to the original concept of hybrid trees In turn nonparametric techniques based on Parzen kernels and orthogonal series are employed to address concept drift in the problem of non stationary regressions and classification in a time varying environment Lastly an extremely challenging problem that involves designing ensembles and automatically choosing their sizes is described and solved Given its scope the book is intended for a professional audience of researchers and practitioners who deal with stream data e.g. in telecommunication banking and sensor networks

Anderson's Pediatric Cardiology E-Book Robert H. Anderson, Kumar Krishna, Andrew Redington, James S. Tweddell, Justin Tretter, 2019-04-29 As a leading reference on pediatric cardiology and congenital heart disease Anderson's Pediatric Cardiology provides exhaustive coverage of potential pediatric cardiovascular anomalies potential sequelae related to these anomalies comorbidities and neurodevelopmental problems and current methods for management and treatment The fully revised 4th Edition addresses significant and ongoing changes in practice including recent developments in fetal neonatal and adult congenital heart conditions as well as expanded content on intensive care nursing issues and societal implications The outstanding illustration program provides superb visual guidance and is now supplemented with a remarkable collection of more than 200 professionally curated author narrated videos Offers

authoritative long term coverage of a broad spectrum of cardiology conditions including congenital heart disease adult congenital heart disease ACHD acquired heart disease cardiomyopathies and rhythm disturbances Features exquisite specimen images by Dr Robert Anderson and Diane Spicer dissected in easily recognizable analogous imaging planes These are included in the over 850 anatomic photographic imaging and algorithmic figures and incorporate new images using virtual dissections of 3D datasets obtained in living patients An extensive new section describing the non cardiac consequences of congenital cardiac disease and other related issues Outside the Heart including new chapters on quality improvement in congenital cardiac disease models of care delivery neurocognitive assessment and outcomes psychosocial issues for patients and families ethics nursing implications acute and chronic renal complications and telemedicine Three entirely new expanded sections on the Functionally Univentricular Heart Fetal Congenital Cardiac Disease and Heart Failure and Transplantation Provides a new focus on patient and family centered care with expert advice on how to communicate difficult diagnoses to patients and families Features new integration of nursing content into all disease specific chapters as well as updated content on genetics congenital heart disease and follow up and new imaging modalities Contains chapters on new and emerging topics such as MRI and Quantifying the Fetal Circulation in Congenital Cardiac Disease Congenital Anomalies of the Coronary Arteries and The Global Burden of Pediatric Heart Disease and Pediatric Cardiac Care in Low and Middle Income Countries Shares the experience and knowledge of an international team of multidisciplinary experts in medicine and advanced practice nursing Expert Consult™ eBook version included with purchase This enhanced eBook experience allows you to search all of the text tables and figures from the book on a variety of devices [Official Gazette of the United States Patent and Trademark Office](#) ,2000 **Advanced Manufacturing Methods** Catalin I. Pruncu,Jamal Zbitou,2022-08-26 Advanced Manufacturing Methods Smart Processes and Modeling for Optimization describes developments in advanced manufacturing processes and applications considering typical and advanced materials It helps readers implement manufacturing 4 0 production techniques and highlights why a consolidated source and robust platform are necessary for implementing machine learning processes in the manufacturing sector Discusses the industrial impact of manufacturing process Provides novel fundamental manufacturing solutions Presents the various aspects of applications in advanced materials in correlation of physical properties with macro micro and nanostructures Reviews both classical and artificial manufacturing when applied with typical and novel innovative materials Aimed at those working in manufacturing mechanical and optimization of manufacturing processes this work provides readers with a comprehensive view of current development in and applications of advanced manufacturing **The Hybrid Series** Andrew Harding,2012-01-31 What appears to be a fortuitous meeting with Harvey Burgess Alison Grey Alli begins a relationship with him that will not only open the door to her emotions but will unravel the very being of her own existence As Harvey s seemingly innocent approach in her life becomes even clearer she aids him in his own detective work to track down a deranged and merciless serial killer a

man that shows little remorse as he continues his quest for brutality Andrew Harding delivers a compelling and seductive tale in his novel *The Hybrid Series Split Decision* engrossing the mind with a world of eroticism and the hunt for a man that will stop at nothing to avenge his own demons that have haunted him throughout his childhood and along with Alli's psychic ability to track the killer down lead to a compelling climax

Handbook of Metaheuristics Michel Gendreau, Jean-Yves Potvin, 2018-09-20 The third edition of this handbook is designed to provide a broad coverage of the concepts implementations and applications in metaheuristics The book's chapters serve as stand alone presentations giving both the necessary underpinnings as well as practical guides for implementation The nature of metaheuristics invites an analyst to modify basic methods in response to problem characteristics past experiences and personal preferences and the chapters in this handbook are designed to facilitate this process as well This new edition has been fully revised and features new chapters on swarm intelligence and automated design of metaheuristics from flexible algorithm frameworks The authors who have contributed to this volume represent leading figures from the metaheuristic community and are responsible for pioneering contributions to the fields they write about Their collective work has significantly enriched the field of optimization in general and combinatorial optimization in particular Metaheuristics are solution methods that orchestrate an interaction between local improvement procedures and higher level strategies to create a process capable of escaping from local optima and performing a robust search of a solution space In addition many new and exciting developments and extensions have been observed in the last few years Hybrids of metaheuristics with other optimization techniques like branch and bound mathematical programming or constraint programming are also increasingly popular On the front of applications metaheuristics are now used to find high quality solutions to an ever growing number of complex ill defined real world problems in particular combinatorial ones This handbook should continue to be a great reference for researchers graduate students as well as practitioners interested in metaheuristics

Computer Applications for Handling Legal Evidence, Police Investigation and Case Argumentation Ephraim Nissan, 2012-06-15 This book provides an overview of computer techniques and tools especially from artificial intelligence AI for handling legal evidence police intelligence crime analysis or detection and forensic testing with a sustained discussion of methods for the modelling of reasoning and forming an opinion about the evidence methods for the modelling of argumentation and computational approaches to dealing with legal or any narratives By the 2000s the modelling of reasoning

on legal evidence has emerged as a significant area within the well established field of AI Law An overview such as this one has never been attempted before It offers a panoramic view of topics techniques and tools It is more than a survey as topic after topic the reader can get a closer view of approaches and techniques One aim is to introduce practitioners of AI to the modelling legal evidence Another aim is to introduce legal professionals as well as the more technically oriented among law enforcement professionals or researchers in police science to information technology resources from which their own respective field stands to benefit Computer scientists must not blunder into design choices resulting in tools objectionable for legal professionals so it is important to be aware of ongoing controversies A survey is provided of argumentation tools or methods for reasoning about the evidence Another class of tools considered here is intended to assist in organisational aspects of managing of the evidence Moreover tools appropriate for crime detection intelligence and investigation include tools based on link analysis and data mining Concepts and techniques are introduced along with case studies So are areas in the forensic sciences Special chapters are devoted to VIRTOPSY a procedure for legal medicine and FLINTS a tool for the police This is both an introductory book possibly a textbook and a reference for specialists from various quarters **Ebook:**

Fundamentals of Corporate Finance HILLIER,2011-01-16 Ebook Fundamentals of Corporate Finance Social
Computing with Artificial Intelligence Xun Liang,2020-09-16 This book provides a comprehensive introduction to the application of artificial intelligence in social computing from fundamental data processing to advanced social network computing To broaden readers understanding of the topics addressed it includes extensive data and a large number of charts and references covering theories techniques and applications It particularly focuses on data collection data mining artificial intelligence algorithms in social computing and several key applications of social computing application and also discusses network propagation mechanisms and dynamic analysis which provide useful insights into how information is disseminated in online social networks This book is intended for readers with a basic knowledge of advanced mathematics and computer science **Intelligent Computing Paradigm: Recent Trends** J. K. Mandal,Devadutta Sinha,2019-04-23 This book

includes extended versions of selected works presented at the 52nd Annual Convention of Computer Society of India CSI 2017 held at Science City Kolkata on 19 21 January 2018 It features a collection of chapters focusing on recent trends in computational intelligence covering topics such as ANN neuro fuzzy based clustering edge detection data mining mobile cloud computing intelligent scheduling processing and authentication It also discusses societal applications of these methods As such it is useful for students researchers and industry professionals working in the area of computational intelligence

Power Sharing in a Divided Nation Johan Saravanamuttu,2017-03-09 This book argues that Malaysia s electoral politics have historically been premised on a hybridized model of communalism and consociationalism Beyond this it posits a newer idea of power sharing based on the dynamic and transformative practice of mediated communalism through six decades 1952 2016 of electoral politics The strategy of mediating communalism is critically explored throughout the book serving to test its

saliency as a distinct approach to power sharing in a social formation which is ethnically religiously and regionally divided yet has remained remarkably and tenuously integrated throughout Malaysia's electoral history The book delves into this question by narrating and theorizing the complexity of communal politics leading to the emergence of new politics which have attempted to put Malaysia on the track of further democratization It is further implied that new politics has to work in tandem with mediated communalism to transcend the most deleterious effects of an ethnically divided society **Applied Mechanics Reviews** ,1986 Intelligent System and Computing Yang Yi,2020-04-29 The book Intelligent System and Computing reports the theory mathematical models algorithms design methods and applications of intelligent systems and computing It covers various disciplines including computer and information science electrical and computer engineering natural sciences economics and neuroscience The broad ranging discussion covers the key disciplines in computational science and artificial intelligence as well as advances in neuromorphic computing deep learning the Internet of Things computer vision and many others This volume provides both academics and professionals with a comprehensive overview of the field and presents areas for future research The Cambridge Handbook of Competition Law Sanctions Tihamer Tóth,2022-06-23 This handbook brings together an international roster of competition law scholars and practitioners to address the issue of sanctions in competition law from all angles Covering nineteen jurisdictions around the world the book analyzes the theoretical foundations and practice of sanctioning competition law infringements and most importantly cartels Contributors include a range of experts drawing on criminal law company law labor law human rights and law and economics to determine what sanctions are available as a matter of positive law against corporations and individuals including fines and other criminal administrative and civil law sanctions whether law enforcers are using these sanctions effectively and if new sanctions including individual sanctions should be introduced *Differential Equations - Theory, Modeling, Data Assimilation and Algorithms* Don Kulasiri,2025-10-01 Rooted in years of interdisciplinary research and collaboration the chapters in this book highlight the central role of differential equations in describing how systems evolve across science and engineering while emphasizing the modern need to connect theory with data and computation It bridges rigorous mathematical foundations with the practical challenges of modeling and inference demonstrating how data assimilation refines models using observations and how advanced numerical algorithms enable the study of complex systems beyond analytical reach By addressing the interplay between models data and computation the book equips advanced students researchers and practitioners with the understanding and tools needed to apply differential equations meaningfully in contemporary scientific inquiry
