Lees,2005-01-25 Over the last three decades the process industries have grown very rapidly with corresponding increases in
the quantities of hazardous materials in process storage or transport Plants have become larger and are often situated in or
close to densely populated areas Increased hazard of loss of life or property is continually highlighted with incidents such as
Flixborough Bhopal Chernobyl Three Mile Island the Phillips 66 incident and Piper Alpha to name but a few The field of Loss
Prevention is and continues to be of supreme importance to countless companies municipalities and governments around the
world because of the trend for processing plants to become larger and often be situated in or close to densely populated
areas thus increasing the hazard of loss of life or property This book is a detailed guidebook to defending against these and
many other hazards It could without exaggeration be referred to as the bible for the process industries This is THE standard
reference work for chemical and process engineering safety professionals For years it has been the most complete collection
of information on the theory practice design elements equipment regulations and laws covering the field of process safety An
entire library of alternative books and cross referencing systems would be needed to replace or improve upon it but
everything of importance to safety professionals engineers and managers can be found in this all encompassing reference
