Italiana E Inglese Francesca Capano, Maria Ines Pascariello, Massimo Visone, 2018-10 This volume proposes a rich corpus of papers about the Other City a subject only a few times dealt with but worthy of all our attention it imposes itself on

the scene of international modern and contemporary historiography for its undeniable topicality Throughout history the city has always had to deal with social otherness i e with class privileges and consequently with discrimination and marginalization of minorities of the less well off of foreigners in short with the differences in status culture religion So that the urban fabric has ended up structuring itself also in function of those inequalities as well as of the strategic places for the exercise of power of the political military or social control of the spaces for imprisonment for the sanitary isolation or for the temporary remedy to the catastrophes From the first portraits of cities made and diffused at the beginning of the fifteenth century for political exaltation purposes or for religious propaganda and for devotional purposes which often through increasingly refined graphic techniques distort or even deny the true urban image we reach at the dawn of contemporary history the new meaning given by scientific topography and new methods of representation these latter aimed at revealing the structure and the urban landscape in their objectivity often unexpected for who had known the city through the filter of regime iconography The representation of the urban image still shows the contradictions of a community that sometimes includes and even exalts the diversities other times rejects them showing the unease of a difficult integration

Toxic Matters Monica Seger, 2022-06-10 In *Toxic Matters* Monica Seger considers two Italian environmental disasters an isolated factory explosion in Seveso just north of Milan in 1976 and the ongoing daily toxic emissions from the Ilva steelworks in the Apulian city of Taranto Both have exposed residents to high concentrations of the persistent organic pollutant known as dioxin Although different in terms of geography and temporality Seveso and Taranto are deeply united by this nearly imperceptible substance and by the representational complexities it poses They are also united by creative narrative expressions in literary cinematic and other forms that push back against dominant contexts and representations perpetuated by state and industrial actors Seger traces a dialogue between Seveso and Taranto exploring an interplay between bodies soil industrial emissions and the wealth of dynamic particulate matter that passes in between At the same time she emphasizes the crucial function of narrative expression for making sense of this modern day reality and for shifting existing power dynamics as exposed communities exercise their voices While *Toxic Matters* is grounded in Italian cases and texts it looks outward to the pressing questions of toxicity embodiment and storytelling faced by communities worldwide

Elemental Narratives Enrico Cesaretti, 2020-09-29 Over the past century the Italian landscape has undergone exceedingly rapid transformations shifting from a mostly rural environment to a decidedly modern world This changing landscape is endowed with a narrative agency that transforms how we understand our surroundings Situated at the juncture of Italian studies and ecocriticism and following the recent material turn in the environmental humanities *Elemental Narratives* outlines an original cultural and environmental map of the *bel paese* Giving equal weight to readings of fiction nonfiction works of visual art and physical sites Enrico Cesaretti investigates the interconnected stories emerging from both human creativity and the expressive eloquence of glocal materials such as sulfur petroleum marble steel and asbestos that have helped make and

Secolo breve epoca di speranze e tragedie et della fine delle ideologie Sono tante le definizioni del Novecento nel terzo millennio in quella geografia enigmatica e indecifrabile che il postmoderno Demonizzato o santificato incolpato o assolto ha impresso una svolta epocale a economia e politica ha inciso nel tessuto culturale e sociale del nostro paese infrangendo equilibri secolari mandando in frantumi la linea di continuit tra passato e futuro Fino al salto decisivo il tramonto della civilt contadina e l avvento dell industrializzazione Attraverso snodi e fenomeni della storia italiana Giuseppe Lupo appassionato

studioso della stagione del boom economico ripercorre il paradigma interpretativo del moderno dando voce alle sue figure più rappresentative da Vittorini a Testori da Fortini a Mastronardi da Calvino a Pasolini. Facendo luce sul controverso rapporto fra umanesimo e scienza nella narrativa di fabbrica e nei periodici aziendali del secondo dopoguerra da Donnarumma all'assalto di Ottiero Ottieri a Memoriale di Paolo Volponi dalla rivista Pirelli a Civiltà delle Macchine approda al realismo liquido odierno dominato dalla fine di quel proletariato che un tempo pareva marciare compatto e oggi sembra invece fragile e desueto. Se persone comuni ed élite intellettuali hanno reagito spesso con disagio e diffidenza a oscillazioni e problematiche che il vento del progresso ha portato con sé, forse è arrivato il momento di invertire la rotta. Di far riemergere dal sottosuolo in cui rimasta nascosta una controlettura della modernità originale alternativa progettuale che aspiri a modificare il mondo a recidere il cordone ombelicale con il secolo terribile e maestoso di cui ci sentiamo ancora figli.

Vedo l'ammazzo e torno

Marco Giusti, 2013-09-18. Nessuno sa parlare di cinema come Marco Giusti: la sua intelligenza a contropelo e il suo personalissimo mix di ironia e candore adolescenziale fanno già parte del nostro immaginario collettivo. Con lo sguardo di chi è sempre pronto a premiare il coraggio e la sperimentazione e a emozionarsi davanti a un congegno narrativo perfetto e a esaltarsi davanti a una gag geniale o una sparatoria mozzafiato, Giusti ci accompagna in un viaggio lungo più di un anno tra commedie borghesi e scorreggione, film autoriali e kolossal hollywoodiani in 3D. Vedo l'ammazzo e torno, il diario colto di un cinefilo sui generis che non risparmia niente e nessuno: l'imbarazzante diplomazia internazionale del cinema italiano, la pavidità dei produttori e la qualità sempre più scadente delle sceneggiature, i budget ministeriali che si assottigliano e la ridicola pervasività degli sponsor locali, la critica parruccona impantanata in logiche sorpassate. Ma la sconcertante situazione del nostro cinema, solo lo specchio della deriva culturale e politica di un'Italia ormai fuori controllo in cui i comici spopolano al governo e le battaglie elettorali si combattono in televisione, un paese di cui Giusti ci regala un affresco vivido e indimenticabile.

Russian Energy Chains Margarita M. Balmaceda, 2021-05-11. Russia's use of its vast energy resources for leverage against post-Soviet states such as Ukraine is widely recognized as a threat. Yet we cannot understand this danger without also understanding the opportunity that Russian energy represents. From corruption-related profits to transportation fee income to subsidized prices, many within these states have benefited by participating in Russian energy exports. To understand Russian energy power in the region, it is necessary to look at the entire value chain, including production, processing, transportation, and marketing, and at the full spectrum of domestic and external actors involved, from Gazprom to regional oligarchs to European Union regulators. This book follows Russia's three largest fossil fuel exports: natural gas, oil, and coal, from production in Siberia through transportation via Ukraine to final use in Germany, in order to understand the tension between energy as threat and as opportunity. Margarita M. Balmaceda reveals how this dynamic has been a key driver of political development in post-Soviet states in the period between independence in 1991 and Russia's annexation of Crimea in 2014. She analyzes how the physical characteristics of different types of energy by shaping how they can be transported
