Shimomura,H. Ohashi,2013-11-20 This book provides a new perspective of China's controversial foreign aid strategy The chapters offer a thorough examination of data to show how China has created knowledge in its long experiences of aid and how this accumulated knowledge could contribute to other developing countries The book also examines China's aid philosophy and strategy through an Asian perspective instead of the Western perspective that is postulated in existing academic literature This is important as China shares a number of common features with other Asian donors including India and Japan Finally the book explores how to utilize the potential effect of this rising major donor for worldwide development and poverty reduction **The Dynamics of Asian Economic Development** Hitoshi Hirakawa,Ferdinand C.

Maquito,2024-12-10 One feature of this book is the clarification of the development mechanism of Asia as a regional economy for over half a century based on an Asian Economy Within the Global Economy approach that goes beyond the single country analytical framework The development of emerging economies has caught the world's attention from the Newly Industrializing Countries or Newly Industrializing Economies of the 1980s to the BRICs entering this century General economics cannot clarify the internal mechanism of the changing of newly industrialized economies led by Asia This book clarifies such regional development structure by focusing on the direct investments of multinational firms and the importance of gradual changes of specific policies adopted by newly industrialized economies Moreover the book concretely deals with the US-China trade war and China's Belt and Road Initiative BRI as a problem of Asian economies In so doing the book not only perceives the structural change of the global economy as a structural change from a US-centric global economy of the twentieth century to a China-centric one but also focuses on the birthing of a new growth frontier in the world economy under a crisis brought about by a war for hegemony between the US and China The investment initiative through China's BRI has prompted the investment competition between Japan and the US which has made even stronger the possibility of giving birth to a new economic frontier in Afro-Eurasia Another feature is the consideration of various issues that confront Asian countries in their search for economic development using the Philippines as a case study The analysis of the study points to the importance of a shared growth perspective which is based on an Asian development model and discusses the challenge of overcoming the issues of the economic development model within the region At the same time this book studies the significance and new issues as a region of the economy and overseas policies of attention drawer China **A World of**

Aid and Authoritarianism in Africa Tobias Hagmann, Professor Filip Reyntjens, 2016-03-15 In 2013 almost half of Africa s top aid recipients were ruled by authoritarian regimes While the West may claim to promote democracy and human rights in practice major bilateral and international donors such as USAID DFID the World Bank and the European Commission have seen their aid policies become ever more entangled with the survival of their authoritarian protégés Local citizens thus find themselves at the receiving end of a compromise between aid agencies and government elites in which development policies are shaped in the interests of maintaining the status quo Aid and Authoritarianism in Africa sheds light on the political intricacies and moral dilemmas raised by the relationship between foreign aid and autocratic rule in Africa Through contributions by leading experts exploring the revival of authoritarian development politics in Ethiopia Uganda Rwanda Cameroon Mozambique and Angola the book exposes shifting donor interests and rhetoric as well as the impact of foreign aid on military assistance rural development electoral processes and domestic politics In the process it raises an urgent and too often neglected question to what extent are foreign aid programmes actually perpetuating authoritarian rule
