Newman, 2010-09 Is globalization making our world more equal or less Proponents of globalization argue that it is helping and that in a competitive world no one can afford to discriminate except on the basis of skills Opponents counter that globalization does nothing but provide a meritocratic patina on a consistently unequal distribution of opportunity Yet despite the often deafening volume of the debate there is surprisingly little empirical work available on the extent to which the process of globalization over the past quarter century has had any effect on discrimination Tackling this challenge *Discrimination in an Unequal World* explores the relationship between discrimination and unequal outcomes in the appropriate geographical and historical context Noting how each society tends to see its particular version of discrimination as universal and obvious the

editors expand their set of cases to include a broad variety of social relations and practices However since methods differ and are often designed for particular national circumstances they set the much more ambitious and practical goal of establishing a base with which different forms of discrimination across the world can be compared Derived from a broad array of methods the book draws many important lessons on the new means by which the world creates social hierarchies the democratization of inequality and the disappearance of traditional categories

Financing Higher Education Worldwide D. Bruce Johnstone, Pamela N. Marcucci, 2010-06-07 No issue in higher education is as salient or as controversial as finance As demand for higher education around the world grows so do the costs associated with it especially as governments shoulder less of the burden Tuition fees rise and student loan debt grows Who pays for these surging costs Who should pay D Bruce Johnstone and Pamela N Marcucci examine the universal phenomenon of cost sharing in higher education where financial responsibility shifts from governments and taxpayers to students and families They find that growing costs for education far outpace public revenue streams that once supported it Even with financial aid and scholarships defraying some of these costs students are responsible for a greater share of the cost of higher education Featuring comprehensive economic and policy data the authors international comparative approach shows how economically diverse countries all face similar cost sharing challenges So who should pay for higher education While cost sharing is both politically and ideologically debated Johnstone and Marcucci contend that for almost all countries it is imperative for the financial health of colleges and universities bringing better efficiency equity and responsiveness **Financing Higher Education Worldwide** combines sophisticated economic explanations with sensitive political and cultural analyses of the financial pressures facing higher education throughout the world
