while on one level amenable to change have also co-opted students into their ranks to create co-responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution. This book maps the contours of student discontent a year after the start of the FeesMustFall revolt. Student voices dissect colonialism, improper compromises by the founders of democratic South Africa, feminism, worker rights and meaningful education. In-depth assessments by prominent scholars reflect on the complexities of student activism, its impact on national and university governance and offer provocative analyses of the power of the revolt.

Financing Higher Education Worldwide D. Bruce Johnstone, Pamela N. Marcucci, 2010-06-07 Examines the universal phenomenon of cost sharing in higher education where financial responsibility shifts from governments and taxpayers to students and families. Growing costs for education far outpace public revenue streams that once supported it. Even with financial aid and scholarships defraying some of these costs, students are responsible for a greater share of the cost of higher education. Shows how economically diverse countries all face similar cost sharing challenges. While cost sharing is both politically and ideologically debated, it is imperative to implement it for the financial health of colleges and universities. From publisher description.

Financing Access and Equity in Higher Education, 2019-02-11 The demand for higher education worldwide is booming. Governments want well-educated citizens and knowledge workers but are scrambling for funds. The capacity of the public sector to provide increased and equitable access to higher education is seriously challenged. What are the on-the-ground realities of developing financial resources and policies to meet the twin goals of equity and access without jeopardizing quality? This volume provides in-depth reports from selected countries and sub-regions: Morocco, Korea, England, Uganda, Poland, Oman, East and southern Africa, Southeast Asia, Brazil and Egypt. Each chapter is written by a seasoned educator participating in the Fulbright New Century Scholar program for 2007-2008. Given the near-universal constraints of declining resources but increasing enrollments, the authors identify common trends such as the public-private divide, the privatization of the public sector and diversification of funding. To address these issues, the chapters examine a surprising variety of policy instruments such as means testing, targeted subsidies, cost sharing, institutional aid, student bursaries and tax exemptions.

In Pursuit of Epistemic Healing in South African Universities Wanelisa Xaba, 2025-09-30 This book demonstrates the epistemic challenges in the South African education system and asks readers to think critically about the university's role in a decolonial future. Wanelisa Xaba reveals how Western colonial educational models severed indigenous ways of knowing and learning across the Global South and settler colonial contexts. Presenting narratives capturing ongoing histories of violence, this book shows how Black South African students navigate intersecting identities of race, class, gender and spirituality within university settings. It shows how racial discrimination from fellow students, academics and staff coupled with discriminatory language policies, financial exclusion and violent colonial curricula affects Black students' wellbeing on university campuses. Xaba argues that these intersecting colonial violences mirror spiritual violence, hinder their holistic citizenship in South African universities and

result in psycho spiritual disease By centring Black students voices this book provides crucial insights for educators policymakers activists healers and institutions committed to creating affirming academic spaces and epistemic healing It is an insightful read for scholars researching decoloniality in higher education as well as students of feminist studies decolonial theory educational justice and critical university studies **My Money** Gerald Mwandambira,2024-06-07 Money is a tool that we can all master You choose to either be a Money Slave or a Money Master My Money written by Gerald Mwandambira is a practical easy to read personal finance book A guide that will help many ordinary people begin to create wealth and not fear the subject of personal financial planning A treasure trove of useful advice and tips this book is essential reading to gain a basic understanding of money mechanics A guide to help you find your confidence and see money as it really is a tool that anyone can use With a chapter dedicated to almost every financial situation we face in our lives My Money will become your go to book that will help you unlock your financial potential and gain control of your financial affairs You too have the potential to become a Money Master
