Fernando José Walsh,2025-10-09 Is science truly the enemy of faith Can a practicing scientist believe in God Is there an inevitable clash between scientific knowledge and the Bible From Copernicus 1473 1543 to contemporary researchers 200 highly distinguished scientists provide compelling testimony that science clearly affirms a Creator one perfectly consistent with the God revealed in the Scriptures This book delves into the lives and powerful convictions of these titans of science who were also giants of faith The culmination of years of deep investigation this book uncovers a profound truth often obscured by media influence the supposed incompatibility between science and faith is a fallacy Instead it reveals that modern science was born and accelerated by thinkers who based their research on the foundational belief in a wisely designed universe They saw nature s laws as the imprint of a Supreme Creator who empowered humanity created in His image to discover these laws for universal good Explore the inspiring journeys remarkable achievements and deep spiritual convictions of legendary figures like Newton Galileo Pascal Morse Pasteur Edison Marconi and Einstein Featured within are over 30 Nobel Prize winners in crucial scientific fields alongside astronauts whose perspectives were transformed by their experiences Grounded in extensive meticulous research the book champions its thesis with undeniable clarity Science demonstrates that God exists
