Mano Dura Sonja Wolf, 2017-01-31 In 1992 at the end of a twelve year civil war El Salvador was poised for a transition to democracy Yet after longstanding dominance by a small oligarchy that continually used violence to repress popular resistance El Salvador's democracy has proven to be a fragile one as social ills poverty chief among them have given rise to neighborhoods where gang activity now thrives Mano Dura examines the ways in which the ruling ARENA party used gang violence to solidify political power in the hands of the elite culminating in draconian iron fist antigang policies that undermine human rights while ultimately doing little to address the roots of gang membership Drawing on extensive ethnographic fieldwork and policy analysis Mano Dura examines the activities of three nongovernmental organizations NGOs that have advocated for more nuanced policies to eradicate gangs and the societal issues that are both a cause and an effect of gang proliferation While other studies of street gangs have focused on relatively distant countries such as Colombia Argentina and Jamaica Sonja Wolf's research takes us to a country closer to the United States where forced deportation has brought with it US gang culture Charting the limited success of NGOs in influencing El Salvador's security policies the book brings to light key contextual aspects including myopic media coverage and the ironic populist support for ARENA despite the party's protection of the elite at the expense of the greater society

Designing an Efficient Management System Tanachart Raoprasert, Sardar M. N. Islam, 2010-04-15 1. Background of the Study Efficiency in Cross Cultural International Business Management Efficient business management is crucial in achieving corporate national or international multinational goals such as higher value, comprehensiveness, corporate governance, etc. Efficient business management can be achieved by resolving agency problems existing among different stakeholders in corporations. In international business, agency problems may exist between managers, owners, staff, and other stakeholders who come from different cultures. Therefore, there is a need in designing efficient management of international business by understanding the factors, the convergence factors which cause differences in the interests and cultures of different stakeholders. International business refers to all commercial transactions between two or more nations. Because it comprises a large and growing portion of current world business practice, international business has received considerable attention in academic research. Daniels and Radebaugh (1998) International business differs in important ways from business conducted within national borders and poses additional challenges to managers and investors in foreign countries. Mahoney et al (1998) In this context, Black et al (1999) state that effective management is increasingly recognized as a key determinant of success or failure, arguing that the success of international business in multinational companies depends most significantly on the quality of management systems. Stroh and Caligiuri (1998) As international business involves people from different cultures, every business function including managing a workforce, marketing, output, and dealing with regulators has the potential to involve cross-cultural problems. Zineldin (2007)
