Elements of Statistics for the Life and Social Sciences Braxton M. Alfred, 2012-12-06 This book was written to myself at about the time I began

graduate studies in anthropology the sort of thing a Samuel Beckett character might do It is about the conduct of research In a very real sense the purpose is partially to compensate for the inadequacies of my professors Perhaps this is what education is about The effort has not been an unqualified success but it has been extremely gratifying I was trained in anthropology After completing the Ph D I went to Stanford on a post doctoral fellowship At the time this was a novelty and the department was not prepared for such a thing To stay occupied I began attending lectures seminars and discussion groups in mathematics and statistics This was about the luckiest choice I ever made The excitement was easily as intense as that which I experienced upon encountering anthropology On one occasion I innocently and independently proved a theorem that had first been done 2000 years earlier It is currently used as an exercise in high school mathematics so it is neither difficult nor arcane Learning all this did not tarnish my sense of discovery On reflection I am puzzled by my failure to have seen all this beauty when I was exposed to it as an undergraduate The unparalleled excellence of the Stanford program was undoubtedly responsible for my belated conversion

Handbook of Survey Methodology for the Social Sciences Lior

Gideon,2012-06-21 Surveys enjoy great ubiquity among data collection methods in social research they are flexible in questioning techniques in the amount of questions asked in the topics covered and in the various ways of interactions with respondents Surveys are also the preferred method by many researchers in the social sciences due to their ability to provide quick profiles and results Because they are so commonly used and fairly easy to administer surveys are often thought to be easily thrown together But designing an effective survey that yields reliable and valid results takes more than merely asking questions and waiting for the answers to arrive Geared to the non statistician the Handbook of Survey Methodology in Social Sciences addresses issues throughout all phases of survey design and implementation Chapters examine the major survey methods of data collection providing expert guidelines for asking targeted questions improving accuracy and quality of responses while reducing sampling and non sampling bias Relying on the Total Survey Error theory various issues of both sampling and non sampling sources of error are explored and discussed By covering all aspects of the topic the Handbook is suited to readers taking their first steps in survey methodology as well as to those already involved in survey design and execution and to those currently in training Featured in the Handbook The Total Survey Error sampling and non sampling errors Survey sampling techniques The art of question phrasing Techniques for increasing response rates A question of ethics what is allowed in survey research Survey design face to face phone mail e mail online computer assisted Dealing with sensitive issues in surveys Demographics of respondents implications for future survey research Dealing with nonresponse and nonresponse bias The Handbook of Survey Methodology in Social Sciences offers how to clarity for researchers in the social and behavioral sciences and related disciplines including sociology criminology criminal justice social psychology education public health political science management and many other disciplines relying on survey methodology as one of their main data collection tools
