Best Kind of College, The Susan McWilliams,John E. Seery,2015-07-06 Small college professors from across the United States explain why liberal arts institutions remain the gold standard for higher education The fevered controversy over America s educational future isn t simply academic those who have proposed sweeping reforms include government officials politicians foundation officers think tank researchers journalists media pundits and university administrators Drowned out in that noisy debate are the voices of those who actually teach the liberal arts exclusively to undergraduates in our nation s small liberal arts colleges or SLACs The Best Kind of College attempts to rectify that glaring oversight As an insiders guide to the liberal arts in its truest form the volume brings together thirty award winning professors from across the country to convey in various ways some of the virtues the

electricity and overall the importance of the small seminar face to face approach to education as typically featured in SLACs Before we in the United States abandon or compromise our commitment to the liberal arts oddly enough precisely at a time when our global competitors are discovering emulating and founding American style SLACs and new liberal arts programs we need a wake up call namely to the fact that the nation s SLACs provide a time tested model of educational integrity and success At last some good news about education This collection brings together essays by professors at small liberal arts colleges voices largely unheard in the debates raging about higher education It ranges widely through disciplines and across colleges taking us into classrooms where we see the creative inventive kinds of teaching that go on when classes are kept small and professors can interact with students This book is a welcome corrective to claims that higher education is broken and in need of a high tech fix a quiet reminder that innovation goes on as a matter of course at colleges where teaching is top priority and is kept to human scale Gayle Greene Scripps College McWilliams and Seery have achieved something remarkable they have found a new and interesting way to present the case for the liberal arts model in American education More than that they have managed to show the value of as well as present the argument for the model At its best the book recreates something of the experience of a liberal arts education in microcosm This is a wonderful provocative engaging and moving book It is unlikely to be surpassed Simon Stow author of Republic of Readers The Literary Turn in Political Thought and Analysis Social Entrepreneurship David Bornstein, Susan Davis, 2010 In development circles there is now widespread consensus that social entrepreneurs represent a far better mechanism to respond to needs than we have ever had before a decentralized and emergent force that remains our best hope for solutions that can keep pace with our problems and create a more peaceful world David Bornstein s previous book on social entrepreneurship How to Change the World was hailed by Nicholas Kristof in the New York Times as a bible in the field and published in more than twenty countries Now Bornstein shifts the focus from the profiles of successful social innovators in that book and teams with Susan Davis a founding board member of the Grameen Foundation to offer the first general overview of social entrepreneurship In a Q A format allowing readers to go directly to the information they need the authors map out social entrepreneurship in its broadest terms as well as in its particulars Bornstein and Davis explain what social entrepreneurs are how their organizations function and what challenges they face The book will give readers an understanding of what differentiates social entrepreneurship from standard business ventures and how it differs from traditional grant based non profit work Unlike the typical top down model based approach to solving problems employed by the World Bank and other large institutions social entrepreneurs work through a process of iterative learning learning by doing working with communities to find unique local solutions to unique local problems Most importantly the book shows readers exactly how they can get involved Anyone inspired by Barack Obama s call to service and who wants to learn more about the essential features and enormous promise of this new method of social change Social Entrepreneurship What Everyone Needs to Know R is the ideal first place to look What Everyone
