Vincent, 2024-12-02 If you ve been considering starting an internet business for some time you ve definitely come across several potential business models Affiliate marketing is probably the most popular You ve been taught to use lead magnets and free gifts to grow your email list Place those lead magnets on a squeeze page and direct traffic there correct To be honest if you ve tried it you ve already learned that it s not that effective After spending time and or money directing traffic to that page you ll typically realize that the majority of individuals aren t providing you with their best email address Indeed approximately one third of them will send you a bogus email And of those that do give you a genuine one it is typically one they reserve for junk as they refer to your advertising material This indicates that it is an address they do not often check making it about as valuable as a bogus one And keep in mind that they are referred to as freebie hunters for a reason They do not truly purchase items Typically at this stage a struggling internet marketer realizes his or her marketing emails are receiving an open rate of approximately 4% or 5% and producing no sales and that all their effort in establishing a lead magnet and landing page as well as driving traffic was a complete waste As a result people abandon instant messaging and conclude that it is all a big fraud It is a sad story yet this occurs on a daily basis and is the final demise of around 95% of would be online merchants Therefore what are the remaining 5% doing differently Easy They are developing and selling their own items You see when you make and sell your own product you re building a different type of list A purchasers list Unlike freebie seekers who never purchase anything and therefore rarely provide their true contact information buyers actually purchase items weird right *Library & Information*
