The Changing Shape of Politics Jonathan Wheatley, 2018-12-17 This book investigates whether politics in Britain in the twenty first century is driven more by issues of culture and identity than by left versus right issues of wealth distribution Drawing from a number of opinion surveys it explores the shifting positions of voters on both economic matters and matters of culture and identity It finds that between 2015 and 2017 support for Britain's main political parties became much more predicated on issues of culture and identity reflecting a radical change in how parties attract voters In the longer term it suggests that issues of culture and identity have become more salient overall possibly because of the oft cited divide between winners and losers of globalisation The book ends by speculating on why politics has become more polarised on these issues rather than on the economic fallout of globalisation and suggests that an explanation is to be found in changing forms of

thoughtful planning and grounded in the mission of libraries it's a model that respected LIS thinker and educator Michael Stephens terms hyperlinked librarianship. And the result for librarians in leadership positions as well as those working on the front lines is flexible librarianship that's able to stay closely aligned with the needs and wants of library users. In this collection of essays from his Office Hours columns in Library Journal, Stephens explores the issues and emerging trends that are transforming the profession. Among the topics he discusses are the importance of accessible, welcoming and responsive library environments that invite open and equitable participation and which factors are preventing many libraries from ramping up community engagement and user-focused services. Challenges, developments and emerging opportunities in the field including new ways to reach users and harness curiosity considerations for prospective librarians from knowing what you want out of the profession to learning how to aim for it why LIS curriculum and teaching styles need to evolve mentoring and collaboration and the concept of the library as classroom a participatory space to experiment with new professional roles new technologies and new ways of interacting with patrons. Bringing together ideas for practice supporting evidence from recent research and insights into what lies ahead, this book will inform and inspire librarians of all types. *Community Groups in Context* Angus McCabe, Jenny Phillimore, 2017-03-15. In the past decade, community groups have been portrayed as the solution to many social problems. Yet the role of below the regulatory radar community action has received little research attention and thus is poorly understood in terms of both policy and practice. Focusing on self-organised community activity, this book offers the first collection of papers developing theoretical and empirically grounded knowledge of the informal, unregistered yet largest part of the voluntary sector. The collection includes work from leading academics, activists, policy makers and practitioners offering a new and coherent understanding of community action below the radar. The book is part of the Third Sector Research Series which is informed by research undertaken at the Third Sector Research Centre funded by the Economic and Social Research Council and Barrow Cadbury Trust.
