Social Problems Around Us:

Social Problems across the Life Course Helena Z. Lopata, Judith A. Levy, 2003-09-03 The human life course is filled with and subject to a wide range of personal difficulties many of which are shared by others Life events and processes such as birth childhood training for and entering an occupation marriage and procreation growing older death and dying are all subject to dilemmas obstacles and barriers Social Problems across the Life Course offers accessible readings that examine the societal construction of social problems out of the personal troubles that people confront at major life stages The essays provide an overview and illustrate the theory and principals that inform both the life course and social problems

Introductions by the editors vividly introduce the research and key theories in this unique anthology perhaps the only one available to help students understand how life stages and personal and social problems interact **Social Problems in Popular Culture** R. J. Maratea, Brian Monahan, 2016-09-28 Popular culture is more than just a broad term for entertainment and frivolous diversions it is also highly relevant to our understanding of society This exciting book is the first to offer insights into the important but often overlooked relationship between popular culture and social problems Drawing on historical and topical examples the authors apply an innovative theoretical framework to examine how facets of popular culture from movies and music to toys games billboards bumper stickers and bracelets shape how we think about and respond to social issues such as problems of gender sexuality and race Including student features evocative case studies and access to online material this book will help students explore and understand the essential connection between popular culture and social problems Deftly combining the fun and irreverence of popular culture with critical scholarly inquiry this timely book delivers an engaging account of how our interactions with and consumption of popular culture matter far more than we may think **Social Problems** Donileen R. Loseke, Joel Best, 2017 This collection of focused essays is directed at several levels of students of social problems It is accessible to the uninitiated who are not familiar with the constructionist literature and aimed at those who are not particularly interested in subtle theoretical and empirical issues of concern to academics studying social problems from constructionist perspectives Some readings focus on the construction of problems by scientists and other professionals others examine the work of social activists mass media and social service personnel Among the topics included are studies of social inequalities and individual deviance a comparison of the images of social problems in the United States with those in other countries and an examination of the importance of politics and power in constructing public images of social problems Constructionist perspectives have become the leading theoretical approach for sociology and allied fields in studying social problems Yet constructionists impact on the teaching of social problems has been far less dramatic Undergraduate courses on social problems are often subject to a theoretical barrage of eclectic perspectives Just as the first social problems textbooks did almost a century ago textbooks continue to present a series of unrelated chapters each devoted to a particular social problem Social Problems is an effort at systematic analysis rather than

random thought on the subject Social Problems presents detailed case studies demonstrating how constructionist perspectives can actually be applied to understand particular social problems While these articles can be read alone the editors have organized these selections to correspond with the chapter topics in the second edition of Donileen Loseke s Thinking about Social Problems an accessible introduction to constructionist approaches At the same time some instructors who use this edited collection might wish to provide their own mix to the selection process Many of the contributions make multiple points and so reasonably could be used to illustrate other basic texts or classic studies in the field of social problems Donileen R Loseke is professor of sociology at the University of South Florida Joel Best is professor and chair Department of Sociology and Criminal Justice University of Delaware He has also served as an advisory editor for Aldine in the area of social problems
