American-Australian Cinema Adrian Danks, Stephen Gaunson, Peter C. Kunze, 2018-01-29 This edited collection assesses the complex historical and contemporary relationships between US and Australian cinema by tapping directly into discussions of national cinema transnationalism and global Hollywood While most equivalent studies aim to define national cinema as independent from or in competition with Hollywood this collection explores a more porous set of relationships through the varied production distribution and exhibition associations between Australia and the US To explore this idea the book investigates the influence that Australia has had on US cinema through the exportation of its stars directors and other production personnel to Hollywood while also charting the sustained influence of US cinema on Australia over the last hundred years It takes two key points in time the 1920s and 1930s and the last twenty years to explore how particular patterns of localism nationalism colonialism transnationalism and globalisation have shaped its course over the last century The contributors re-examine the concept and definition of Australian cinema in regard to a range of local international and global practices and trends that blur neat categorisations of national cinema Although this concentration on US production or influence is particularly acute in relation to developments such as the opening of international film studios in Melbourne Sydney Adelaide and the Gold Coast over the last thirty years the book also examines a range of Hollywood financed and or conceived films shot in Australia since the 1920s

The Normative Structure of Sociology Hermann Strasser, 2014-08-13 In this provocative analysis of the central issues and developments in modern social theory Dr Strasser contends that enquiry into the function tasks and mission of sociology as a discipline can be understood only in relation to the subject's historical development He believes that a discussion of the origin and intention of

sociology particularly in relation to the established social order enables us to grasp fully the nature of sociological theory both past and present He maintains that a sociologist's own position in society and consequently his views on its development and his way of expressing those views will affect the theoretical position he takes up *A Bibliography of Municipal Problems and City Conditions* Robert Clarkson Brooks, 1901
