**Social Workers' Desk Reference** ,2015-04-20 People all over the world are confronted by issues such as poverty a lack of access to quality education unaffordable and or inadequate housing and a lack of needed health and mental services on a daily basis Due to these issues there is a need for social workers who have access to relevant and timely scholarly materials in order to meet the needs of those facing these issues The social psychological and biological factors resulting from these issues determine the level of a person s mental health at any given point in time and it is necessary for social workers to continue to

Work in Health and Aging is the first reference to address this reality by compiling the most current thinking on these subjects in a single volume. With the population of older adults increasing as rapidly as new possibilities for their care, professionals need an accessible source of specialized information about how best to serve the elderly and their families, and they will find this authoritative handbook indispensable. In 100 original chapters, the most experienced and prominent gerontological health care scholars in the United States and across the world provide social workers with up-to-date knowledge of evidence-based practice guidelines for effectively assessing and treating older adults and supporting their families. The contributing authors paint rich portraits of a variety of populations that social workers serve and arenas in which they practice, followed by detailed recommendations of best practices for an array of physical and mental health conditions. Its unprecedented attention to diversity, global trends, and implications for research, government policy, and education make the publication of such a compendium a major event in the field of gerontological social work. Ambitious and multi-dimensional, this handbook represents the best research on health and aging available to social workers today.
