Socials 9 Crossroads A Meeting Of Nations:

Human Rights, Diversity, and National Identity Patricia E. Bromley, 2011 Fundamental world changes that simultaneously undermine a nation state's charisma and promote the rise of a supra national system have wide ranging effects upon national states within a modern global society My dissertation empirically examines the effects of social and cultural globalization on systems of mass schooling which are central institutions in every country Globally primary and secondary education initially emerged as the premier tool for nation states to create a unified national citizenry loyal to their country and socialized into a common cultural tradition I examine the extent to which this original nationalizing purpose of schooling is challenged by the increased emphases on universal human rights and diversity in civic education The analyses consist of two sections Hierarchical linear models are used to analyze a unique primary data source of 521 social science textbooks from 74 countries during the period 1970 2008 These findings show a worldwide increase in emphasis on human rights and increases in discussions of diversity in well established liberal democracies Cross national quantitative analyses are complemented by a qualitative case study of social science curricula in British Columbia BC which examines nation building within a context of strong emphasis on diversity and human rights The BC study utilizes currently approved high school citizenship education textbooks as well as older textbooks dating back to 1871 It also draws on a selection of historical documents including Ministry of Education reports curricular frameworks and high school exit exams Process wise I find the incorporation of human rights and diversity reflects macro level changes in national and global society Content wise I find four main approaches to reconciling ideas of human rights and diversity with national identity 1 framing human rights and multiculturalism as part of national identity 2 using pedagogical approaches that promote multiple perspectives and individual agency 3 celebrating social and scientific figures and accomplishments as the source of national pride and 4 drawing on exogenous sources to affirm state legitimacy This study is one of the first to theorize that civic education worldwide is moving away from a national focus and to provide empirical evidence of this trend A key implication is that educational systems are being repurposed from their original goal of constructing a unitary national citizenry to a new view emphasizing human diversity and equality in a globally interconnected world Further students are increasingly taught that the global civil society and non state actors are important and legitimate agents of social change

History in Public Space Joanna Wojdon, Dorota Wiśniewska, 2024-08-05 This book focuses on various manifestations of history in public spaces in the physical ones of various historical times and geographical places as well as in the virtual world It discusses how the spaces have been shaped and re shaped by whom and for what not always laudable purposes and raises pragmatical and ethical questions for both research and practical activities in the field By combining both micro and global perspectives the universal role that history plays in spaces created by and for as well as the factors determining its usages is revealed The authors are rooted in specific national contexts Canadian or American Ukrainian or Polish British or Irish German or

Luxembourgish Korean or Brazilian and the case studies are varied including large cities and small towns city centers and godforsaken cemeteries but the narratives built on these cases go beyond when they deal with issues such as decoding history and its meanings in public spaces doing history in public spaces and observing changes in manifestations of history in public spaces This volume is an essential resource for anyone interested in the relationship between history and public space in a global perspective Resources in Education ,2001-04 **Social Sciences Index** ,2000 Daily Report ,1994-06

California in a Time of Excellence James Andrew LaSpina,2009-02-26 Follows California s efforts at reforming the public school system from 1983 to the present Climate Change Finance and International Law Alexander Zahar,2016-12-01 Since 2010 a significant quantity of international climate change finance has begun to reach developing countries However the transfer of finance under the international climate change regime the legal and ethical obligations that underpin it the constraints on its use its intended outcomes and its successes failures and future potential constitutes a poorly understood topic Climate Change Finance and International Law fills this gap in the legal scholarship The book analyses the legal obligations of developed countries to financially support qualifying developing countries to pursue globally significant mitigation and adaptation outcomes as well as the obligations of the latter under the international regime of financial support Through case studies of climate finance mechanisms and a multitude of other sources this book delivers a rich legal and empirical understanding of the implementation of states climate finance obligations to date The book will be of interest to scholars and students of international law and policy international relations and the maturing field of climate change law

OSS Foreign Nationalities Branch Files, 1942-1945 United States. Office of Strategic Services. Foreign Nationalities Branch,1988 Documents consist of departmental memos and reports correspondence with individuals and press clippings and press reports which deal with American Jewish groups during 1942 1945 as well as issues relating to Palestine Jews and Jewish refugees during World War II **The Survey** ,1922 **The Achievements of International Law** Jacques Hartmann,Urfan Khaliq,2021-07-29 The aim of this collection of essays in Robin Churchill s honour is to discuss some key examples of the achievements of international law with the express aim of exploring both what it has achieved and also its limits This will serve as a response to the two popular but opposite misconceptions about the role of international law One view is that international law is too weak to improve the World in any significant way The other view is that international law is a panacea that can be used to rid the world of many of its ills The book is divided into five distinct parts each reflecting on what international law has achieved within broadly defined substantive areas It opens with a discussion on general international law and international human rights law before exploring the law of the sea and fisheries It then looks at international environmental law before finally examining the use of force and international criminal law The chapters and the collection overall will provide a contrast to the popular misconceptions about international law by offering examples of both the success and also limitations of it as a system Social Rights Jurisprudence Malcolm Langford,2009-01-19 In the space

of two decades social rights have emerged from the shadows and margins of human rights jurisprudence The authors in this book provide a critical analysis of almost two thousand judgments and decisions from twenty nine national and international jurisdictions The breadth of the decisions is vast from the resettlement of evictees to the regulation of private medical plans to the development of state programs to address poverty and illiteracy The jurisprudence not only implicates our understanding of economic social and cultural rights but also challenges the philosophical debates that question whether these rights can and should be justiciable

Madrid CSCE Negotiations, 1980-1981, 1982 **Madrid CSCE Negotiations, 1980-81** United States. Dept. of State. Office of Public Communication, 1982 *Canada and Climate Change* William Leiss, 2022-11-18

Pandemics massive earthquakes war and other catastrophes inspire immediate action because their casualties and destruction are immediately visible Climate change is an unyielding problem because its long range dangers are hidden and thus it is a global risk unlike anything in human experience The federal government recently announced aggressive climate targets for Canada We have committed to producing net zero greenhouse gas emissions by 2050 which will require major changes for our economy and way of life Canadian citizens need to understand why our most distinguished climate scientists and our senior political leaders think that we must meet this target Canada and Climate Change explains the importance of policies that will ensure we meet the net zero emissions target William Leiss provides a firm grasp on what climate change is and how scientists have described shifts in the earth s climate as they have occurred over hundreds of millions of years and as they are likely to occur in the near future especially by the end of this century Leiss argues that citizens have a right to place their trust in what climate scientists tell us Canada and Climate Change is an essential primer on where we stand on the issue of climate change in Canada and what will unfold in the years ahead **Federal Register**, 2000-05-09 **Social Science**, 1935 War and Politics in Sudan Justin D. Leach, 2012-11-26

On 9 July 2011 South Sudan became an independent state after more than half a century of civil conflict wrought with human rights abuse Indeed the post colonial history of Sudan has been characterised by two Civil Wars spanning almost two decades each the first from 1955 1972 and the second from 1983 2005 With questions of national and regional identity at the heart of the conflict the Sudanese Civil Wars have highlighted key questions about the post colonial epoch Justin Leach s *War and Politics in the Sudan* offers a comparative analysis of the First and Second Sudanese Civil Wars along with the peace treaties which ended them Most historians have seen the 1972 Addis Ababa Agreement as a stepping stone to renewed civil conflict in 1983 rather than as a settlement in its own right Leach on the other hand believes that the size of Sudan precludes the application of traditional theories of conflict resolution The introduction of natural resources brought a new facet to the already complex Second Sudanese Civil War Oil for instance internationalised the conflict and added yet another prism through which groups in the conflict could view their identity By tracing the evolving demands of the southern insurgents and the regimes they fought against Leach outlines the main challenges to the Sudanese nationalist project including the strength of southern

regional identities the resurgence of political Islam in the north as well as the sheer duration of the conflict War and Politics in the Sudan thus offers a fresh and timely analysis of a region long beset by civil conflict interethnic violence and poverty a region whose historical narrative has recently taken on a new trajectory Those interested in post colonial Sudanese history are sure to find Leach s arguments both persuasive and pertinent Friends' Intelligencer ,1903 **Crusade Or Conspiracy? Catholics and the Anti-Communist Struggle in Australia** Bruce Duncan,2001 Bitterness over the 1950s split between Catholics and anti Communists has never gone away The importance of this book in defining Labor politics for the last 50 years is crucial and all those interested in either Labor history or history of organised religion in Australia will find it useful **Friends' Weekly Intelligencer** ,1896
