Seeing Society

- Sociology makes society visible
 - Sociology makes society visible

Sociology: scientific exploration of individuals and how individuals create society through interaction.

- Why we need sociology to see society

Social location: the collection of social demographics (your race, class, gender, sexuality, religion, citizenship, etc.) that you hold and how they relate to everyone else in your community and around the world.

- Social location affects:
 1. How you see yourself
 2. How you expect others to treat you
 3. How others treat you
 4. What others expect from you
 5. How others interpret you

YOUR SOCIAL LOCATION HAD NOTHING TO DO WITH YOUR PHYSICAL LOCATION!!!

Worldview: the perspective you have on the world around you. Our individual worldview is shaped by our social, cultural, and personal experiences all of which are profoundly influenced by our social location. Each of us has a worldview and it reflects the biases and assumptions we hold about the world around us.

- "All you see is all there is."
- o If you don't see, hear or learn about something, then it doesn't exist in your version of reality. By implication, this means that there is not a single reality, but rather there are as many realities as there are people in the world. Each of us only has a piece of the picture.
- **FIRST LESSON OF SOCIOLOGY**
 - o Who you are affects what you experience and what you experience affects how you perceive the world around you, think, and behave.
- Why seeing Society is Hard
 - "This is water" by David Foster Wallace (video)
 - Seeing society is hard because our worldview is almost exclusively shaped by our individual experiences.

Explaining Human Behavior

- Sociology is a science that explains human behavior and social phenomena
