Tourism, Tradition and Culture David Harrison, 2020-11-18 David Harrison has contributed to the academic study of tourism over the last 30 years This book brings together a collection of his published material that reflects the role played by tourism in development both in societies emerging from Western colonialism and in societies previously part of the Soviet system The overarching theme looks at how promoted as a tool for development tourism can lead to conflict between competing elites but can also empower groups previously subject to constraint by traditional authorities Tradition is intensely manipulatable and always reflects power relations Such pressure on tradition is but one aspect of tourism s wider social impacts This includes changes in economic and social structure which for many constitute social problems that need to be addressed At the same time sustainability though apparently a worthy aim can be a problematic concept especially when applied to traditional cultures and may conflict with such ideals as egalitarianism The Pedagogy of Pop Edward Janak, Denise F. Blum, 2013 Media competes with public schools in terms of student engagement and time However the two needn t be mutually exclusive The Pedagogy of Pop Theoretical and Practical Strategies for Success discusses a variety of strategies and approaches for using social and mass media as tools through which teachers might improve schooling While there is a vast body of literature in this field editors Edward A Janak and Denise Blum have created a text which differs in two substantive ways scope and sequence In terms of scope this work is unique in two facets first it presents both theory and practice in one volume bridging the two worlds and second it includes lessons from secondary and postsecondary classrooms allowing teachers on all levels to learn from each other In terms of sequence The Pedagogy of Pop draws on lessons from both historical and contemporary practice The introductory section of Janak and Blum s collection presents a pair of papers that use somewhat different approaches to examine the historical roots of contemporary critique Part I presents a series of chapters designed to provide guidelines and theories through which educators on all levels can think about their practice

focusing more on the why of their approach than the how Part II presents a more hands on approach by sharing a variety of specific strategies for incorporating pop culture in all its forms technology music television video games etc in both secondary and postsecondary classrooms The conclusion shows the praxis of teaching with popular culture presenting a counterpoint to current thinking as well as a case study of the best of what can happen when popular culture is applied effectively

Cyberactivism and Citizen Journalism in Egypt

Courtney C. Radsch, 2016-09-23 This compelling book explores how Egyptian bloggers used citizen journalism and cyberactivism to chip away at the state's monopoly on information and recalibrate the power dynamics between an authoritarian regime and its citizens. When the Arab uprisings broke out in early 2011 and ousted entrenched leaders across the region, social media and the Internet were widely credited with playing a role, particularly when the Egyptian government shut down the Internet and mobile phone networks in an attempt to stave off the unrest there. But what these reports missed were the years of grassroots organizing, digital activism, and political awareness raising that laid the groundwork for this revolutionary change. Radsch argues that Egyptian bloggers created new social movements using blogging and social media, often at significant personal risk, so that less than a decade after the information revolution came to Egypt, they successfully mobilized the overthrow of the state and its president.
