Maurice Kwok-to Choi, Kwok-bun Chan, 2013-12-03 Based on a study using online ethnography as the major research method this book explains why and how men in Hong Kong use QQ an online instant messenger to chase women in mainland China especially in the neighboring city of Shenzhen Chasing women through QQ is a reciprocal exchange process during which the resources to be exchanged in the interaction are not negotiated Rather the men provide resources to the women hoping for rewards in return that are not guaranteed This characteristic of the exchange makes men who chase women through QQ very strategic in their action They try to maximize the rewards and minimize the costs by adopting myriad strategies such as constructing an attractive online identity by strategic self presentation The role of emotions in the exchange process is also examined Men learn the emotional norms through the online forum but sometimes it is difficult for them to control their emotions some men fall in love when they are not supposed to As it happens they have failed to calculate the costs and rewards rationally in that

they may provide too many resources to the women without getting enough rewards in return This book provides original insights into the thought processes motivations desires anxieties and risks of Hong Kong men seeking short term sexual relations with women on the mainland These insights are highly relevant to our understanding of the quickly evolving use of social media a phenomenon of worldwide importance and deep implications The Sociology of American Drug Use Charles E. Faupel, Gregory Weaver, Jay Corzine, 2014 Thoroughly revised and updated in its third edition The Sociology of American Drug Use presents a broader sociological perspective on drug use in American society than any other text The authors all sociologically trained criminologists include extensive coverage of various methods and statistics for measuring drug use a topic that is particularly relevant for sociology students The book opens with an examination of the construction of drug use as a social problem setting the stage for the rest of the text The first section addresses basic conceptual methodological and theoretical issues in the study of drug use while the second section analyzes its various social correlates demographic institutional health economic cultural and subcultural and violent and criminal The final section focuses on societal reaction to drug use with discussions of prohibition decriminalization and legalization policy options and drug treatment drug education and drug testing New to the Third Edition Increased material on legal drugs like salvia and an expanded discussion of the recreational use of prescription drugs including the misuse of such drugs as Adderall OxyContin and Vicodin among college students New and updated Drug Controversies boxes Updated information on the pharmaceutical industry and an expanded discussion of the drug approval process with a new flowchart More in depth discussion of cartels and the current drug violence along the U S Mexican border Greater emphasis on cross cultural issues and perspectives including new material on crime and the American dream drug trafficking to the U S and opium production in Afghanistan and the European roots of harm reduction An expanded discussion of the role of the media and more material on family as a social institution An updated and streamlined glossary and bibliography **American Book Publishing Record**, 2003 *Race and Identity in Hispanic America* Patricia Reid-Merritt, Michael S. Rodriguez, 2020-04-03 This book offers a historical and comparative overview of the evolution of racial classifications in the United States Latin America and the Caribbean The Hispanicization of America is precipitating a paradigm shift in racial thinking in which race is no longer defined by distinct characteristics but rather is becoming synonymous with ethnic cultural identity Traditionally assimilation has been conceived of as a unidirectional and racialized phenomenon Newly arrived immigrant groups or longstanding minority indigenous populations were Americanized in confining their racial and ethnic natures to the private sphere and adopting in the public sphere the cultural mores norms and values of the dominant cultural racial group In contrast the Hispanicization of America entails the horizontal assimilation of various groups from Spanish speaking countries throughout the Western Hemisphere and Caribbean into a pan ethnic Hispanic Latino identity that also challenges the privileged position of whiteness as the primary and exclusive referent for American identity Instead of focusing on one Hispanic group ethnic identity or region this

book chronicles the development of racial identity across the largest Hispanic groups throughout the United States
