aspects of food choices Literature citations are appended to each of the 6 text chapters Food and Nutrition Paul Fieldhouse,2013-12-14 As someone who was trained in the clinical scientific tradition it took me several years to start to appreciate that food was more than a collection of nutrients and that most people did not make their choices of what to eat on the biologically rational basis of nutritional composition This realization helped to bring me to an understanding of why people didn't always eat what I believed was good for them and why the patients I had seen in hospital as often as not had failed to follow the dietary advice I had so confidently given When I entered the field of health education I quickly discovered the famous World Health Organization definition of health as being a state of complete physical mental and social well being and not merely the absence of disease Health was a triangle and I had been guilty of virtually ignoring two sides of that triangle As I became involved in practical nutrition education initiatives the deficiencies of an approach based on giving information about nutrition and physical health became more and more apparent The children whom I saw in schools knew exactly what to say when asked to describe a nutritious diet they could recite the food guide and list rich sources of vitamins and minerals but none of this intellectual knowledge was reflected in their own actual eating habits *The Sociology of Food and Eating* Anne Murcott,1983 Abstract Seventeen essays on the sociological significance of food and eating in Britain are presented The focus is to examine the way the British relate culinary practices menus and manners and beliefs and concepts about food values to the social aspects of eating Many of these practices anthropologists note are associated with the sociocultural patterns of specific groups Four chapters examine food ideologies 2 explore lines of thinking and the remainder look at research related to food and eating The 2 major recurring themes are that eating is a moral issue nutritional values are equated to social values and health and that food selection and preparation reflect social structure A bibliography and index are included kbc **What is Food?** Ulla Gustafsson,Rebecca O'Connell,Alizon Draper,Andrea Tonner,2019-11-11 This volume brings together contributions that provide a snapshot of current food research What is Food acknowledges the many dimensions of food including its social cultural symbolic and sensual qualities while also being material in that it is fundamental to our survival The collection addresses contemporary challenges and reflects the concerns of funders and researchers working in the broad field of the sociology of food dietary health sustainability food safety and food poverty Reflecting broader academic trends the chapters are moreover concerned with interdisciplinarity the analysis of change data reuse and the use of social media as data The book includes empirical evidence from around the UK Denmark Sweden Switzerland and Taiwan and addresses food both as a lens through which to examine these wider social relationships processes and social change and as a primary subject The contributions will be of interest to a wide range of students and researchers looking for a cutting edge insight into how to frame and study food in areas related to the sociology of food health risk poverty sustainability and research methods The Sociology of Food and Agriculture Michael S. Carolan,2021-09-27 Thoroughly revised and updated the third edition of *The Sociology of Food and Agriculture* provides a

cutting edge comprehensive introduction to the study of food and society The book begins by examining the food economy with chapters focussing on foodscapes the financialization of food and a new chapter dedicated to food and nutrition in security In Part II the book addresses community and culture While some books only look at the interrelationships between food and culture this section problematizes the food system from the standpoint of marginalized bodies It contains chapters focusing on agricultural and food labor and the peasantries topics which are often overlooked and gender ethnicity and poverty Part III examines food and the environment with chapters addressing important topics such as agro ecosystems food justice sustainable food and agriculture and food sovereignty The final part focuses on food futures and includes a brand new chapter on sustainable diets and ethical consumption The book concludes by showcasing how we can rethink food production and consumption in a way that can help heal social political and cultural divisions All chapters draw on international case studies and include learning objectives suggested discussion questions and recommendations for further reading to aid student learning The Sociology of Food and Agriculture is perfect for students of food studies including food justice food and nutrition security sustainable diets food sovereignty environmental sociology agriculture and cultural studies **Elgar Encyclopedia of Food and Society** Lewis Holloway, Michael K.
