The Cosmic Perspective, 8e (Bennett)

Chapter 5 Light and Matter: Reading Messages from the Cosmos

5.1 Multiple-Choice Questions

1) If you have a 100-watt light bulb, how much energy does it use each minute?

- A) 6,000 joules
- B) 6,000 watts
- C) 600 joules
- D) 600 watts
- E) 100 joules

Answer: A

2) If a material is highly *opaque*, then it

- A) reflects most light.
- B) absorbs most light.
- C) transmits most light.
- D) scatters most light.
- E) emits most light.

Answer: B

3) When light reflects off an object, what is the relation between the angle of incidence and the angle of reflection?

- A) angle of incidence = angle of reflection
- B) angle of incidence + angle of reflection = 90°
- C) angle of incidence + angle of reflection = 180°
- D) angle of incidence - angle of reflection = 90°
- E) It depends on the material that the light reflects off.

Answer: A

4) If a material is *transparent*, then it

- A) reflects light well.

Scarborough, 2008-09-19 When the right answers are found they will be simple and beautiful Einstein Paraphrasing Thomas Kuhn in his Structure of Scientific Revolutions there can be no change in direction of scientific thought unless there is a viable alternative Now after 35 years of persistent research the author's plethora of substantiated evidence offers science a valid alternative to the Big Bang the LB FLIN BEC model of universal origins one that fulfills Einstein's prediction and meets Kuhn's criteria In fulfilling both predictions the new model reveals a plethora of impossibilities comprising the Big Bang myth while forming powerful arguments for relegating the Big Bang to the ashes of history The revolutionary model a macroscopic theory of everything is ideal for a microscopic Theory of Everything Thomas Huxley stated it best The microcosm repeats the macrocosm a connection placing science in a favorable position for attaining the long sought Theory of Everything As long as the Big Bang Accretion hypotheses remain in vogue comprehending universal origins and functions will remain impossible In sharp contrast the new model alternative opens floodgates to definitive evidence of universal origins and functions Why in the Big Bang perspective substantiated solutions to universal anomalies will always remain

unattainable while in the LB FLINE BEC perspective substantiated solutions to universal anomalies are readily attainable Three simple and beautiful examples out of many The dynamic fiery geometrical spacing of planets in elliptical orbits Why Pluto was originally the tenth planet in our Solar System and now is the ninth planet Why extra solar systems are weirdly different from our geometrically spaced Solar System New American Practical Navigator ,1977 *Pub[lication]* - *Defense Mapping Agency* United States. Defense Mapping Agency. Hydrographic/Topographic Center,1977 The Solar System David G. Fisher,Richard R.
