Vivre De Paysage Ou L'impensé De La Raison:

Vivre de paysage ou L'impensé de la Raison François Jullien, 2014-05-21 T00:00:00+02:00 En d'abord finissant le paysage comme la partie d'un pays que la nature présente un observateur qu'avons-nous oublié Car l'espace ouvert par le paysage est-il bien cette portion d'étendue qu'y découpe l'horizon Car sommes-nous devant le paysage comme devant un spectacle Et d'abord est-ce seulement par la vue qu'on peut y accéder ou que signifie regarder En nommant le paysage montagne s'eau x la Chine qui est la première civilisation avoir pensé le paysage nous sort puissamment de tels partis pris Elle dit la corrélation du Haut et du Bas de l'immobile et du mouvant de ce qui a forme et de ce qui est sans forme ou encore de ce qu'on voit et de ce qu'on entend Dans ce champ tensionnel instauré par le paysage le perceptif devient en même temps affectif et de ces formes qui sont aussi des flux se dégage une dimension d'esprit qui fait entrer en connivence Le paysage n'est plus affaire de vue mais du vivre Une invitation remonter dans les choix impensés de la Raison ainsi qu'à reconsidérer notre implication plus originaire dans le monde François Jullien

Living Off Landscape François Jullien, 2018-01-09 Is it only through vision that we can perceive a landscape Is the space opened by the landscape truly an expanse cut off by the horizon Do we observe a landscape in the way that we watch a show What ultimately does it mean to look In this important new book one of France's most influential living theorists argues that the first civilization to truly consider landscape was China In giving landscape the name mountain s water s the Chinese language provides a powerful alternative to Western biases The Chinese conception speaks of a correlation between high and low between the still and the motile between what has form and what is formless between what we see and what we hear No longer a matter of vision landscape becomes a matter of living François Jullien invites the reader to explore reasons unthought choices and to take a fresh look at our more basic involvement in the world

Authority and Displacement in the English-Speaking World (Volume II) Florence Labaune-Demeule, 2016-01-14 Whether one thinks of the modern world or of more remote times both seem to have been affected if not moulded by the interaction between the

concepts of authority and displacement Indeed political and social sources of authority have often been the causes of major geographical displacements as can be illustrated by the numerous waves of migration which have been observed in the past and which are still present today such as the transportation of slaves from African to American coasts in colonial times If displacement can often be understood as spatial displacement it can also be synonymous with psychological social and even aesthetic displacement for instance through different artistic means or through the use of stylistic discursive devices Displacement also entails displacement as well as dislocation or chaos This suggests that the etymological meaning of the term authority auctoritas has to be highlighted thus referring to the author of a particular work and to the different manifestations of the authorial persona in a work of art This collection of essays in two volumes examines the relationships between the concepts of authority and displacement in the English speaking world without restricting the analysis to a particular area or to the field of literature Some essays do indeed deal with literature from different spatial areas and temporal eras while others look into these concepts from a more cultural or aesthetic point of view Volume Two Exploring American Shores includes essays on the place of famous fugitives in American culture notably through the story of Bonnie and Clyde as well as on the links between displacement authority and sculpture on the one hand Placing and Replacing the Capitol Sculptures and on the links between displacement and photography on the other through a study of Joel Sternfeld's Walking the High Line In addition to investigations of Louise Erdrich's novel Books and Islands in Ojibwe Country Canadian landscapes in transit will be studied to highlight the displacement of the Western landscape tradition in English Canada The volume concludes with a study of some literary works by several writers of Guyanese origin first with an essay comparing Martin Carter's and L. on Gontran Damas's literary productions and then with an essay devoted to Fred D. Aguiar's novel The Longest Memory 1994

Ecological Reasonings Kilian Jörg, 2024-10-17 What role does reason have in tackling the catastrophic ecological situation of the early 21st century Can the concept shrug off its problematic role in Western epistemology and find a new place and function in dealing with the Anthropocene In *Ecological Reasonings* Kilian Jörg argues that we ignore reason at our peril This book revolves around the idea that in order to salvage reason we must include it in the current move to pluralize the key concepts of Western philosophy where we once talked of nature science and technology we now talk about nature's sciences and technologies In the same way it is time to reconceptualize reason as reasonings a diverse and multi-perspectival wealth of interactions that can create a vital alternative to the mainstream academic thought Drawing on a broad span of theoretical traditions including new materialism eco-feminism embodied performance and speculative philosophy Jörg weaves countless voices and aspects together to demonstrate the rich texture of his pluralized vision The impact of these new reasonings on the pressing challenges of our time can be seen in the sheer scope of these elements from the role of artificial intelligence to the post-truth society and how science can shape our own self-understanding

First full scale thematic analysis of Pina Bausch s Tanztheater critically evaluating the impact of modernist theatre on her choreographic method **Forms of Experienced Environments** Nathalie Blanc,Théa Manola,Patrick Degeorges,2020-02-26 This book explores environmental forms in terms of their relationships to the socio politico ecological transformations currently in progress Today the environment is a central theme in political discourse scientific work and everyday life It is multi dimensional it is a living space a socio ecological system and a field of research and action However despite the presence and diversity of existing approaches the ways in which policies address environmental issues remain mainly focused on control highlighting the techno ecological managerial and curative dimensions of public actions Although public action tends to instrumentalise the environment the humanities and social sciences have initiated significant reflections in this field proposing alternative ways of thinking about the environment in its multiple aspects and scales As part of another approach to the environment that mirrors contemporary developments this book adopts a form based approach which has been largely neglected by previous studies dealing with environmental themes The analyses provided here will open up a new perspective

on the relationships between people aesthetics and environments and are drawn from different schools of research highlighting the huge potential of reading the environment through forms or conversely a reading of environmental forms

Wirth, 2017-06-05 FINALIST for the 2017 Foreword INDIES

Book of the Year Award in the Philosophy category Meditating on the work of American poet and environmental activist Gary Snyder and thirteenth century Japanese Zen Master Eihei Dogen Jason M Wirth draws out insights for understanding our relation to the planet's ongoing ecological crisis He discusses what Dogen calls the Great Earth and what Snyder calls the Wild as being comprised of the play of waters and mountains emptiness and form and then considers how these ideas can illuminate the spiritual and ethical dimensions of place The book culminates in a discussion of earth democracy a place based sense of communion where all beings are interconnected and all beings matter This radical rethinking of what it means to inhabit the earth will inspire lovers of Snyder's poetry Zen practitioners environmental philosophers and anyone concerned about the global ecological crisis Terra Forma Frederique Ait-Touati,Alexandra Arenes,Axelle Gregoire,2022-02-01

Charting the exploration of an unknown world our own with a new cartography of living things rather than space available for conquest or colonization This book charts the exploration of an unknown world our own Just as Renaissance travelers set out to map the terra incognita of the New World the mapmakers of Terra Forma have set out to rediscover the world that we think we know They do this with a new kind of cartography that maps living things rather than space emptied of life and available to be conquered or colonized The maps in Terra Forma lead us inward not off into the distance moving from the horizon line of conventional cartography to the thickness of the ground from the global to the local Each map in Terra Forma is based on a specific territory or territories and each tool or model creates a new focal point through which the territory is redrawn The maps are living maps always under construction spaces where stories and situations unfold They may map the Earth's underside rather than its surface suggest turning the layers of the Earth inside out link the biological physiology of living inhabitants and the physiology of the land or trace a journey oriented not by the Euclidean space of GPS but by points of life These speculative visualizations can constitute the foundation for a new kind of atlas Aesthetics of Weather

Madalina Diaconu,2024-09-19 In an age of rife consumption and increasing need for consideration of sustainable social practices an exploration of the aesthetics of weather from various angles becomes vital in shedding light on its importance to our experience of the changing world In response offering the first in depth and nuanced examination of the aesthetics of weather this book underlines the relevance the concept has for scientific communication for fostering sustainable patterns of behaviour and for rejecting the environmentally damaging consumption of landscapes and fine weather In addition it provides examples taken from global contemporary popular culture whilst calling attention to the socioeconomic and political dimensions of individual experience demonstrating and analysing our fascination with and cultural interpretations of weather phenomena in our everyday lives Within its three sections the volume reinvents traditional phenomenological methods to create socially politically and historically embedded phenomenographies and explore the importance of aesthetic practices in shaping our experience of weather and climate It also provides a deeper engagement with general topics such as the relationship between perception emotion imagination and cognition in our aesthetic experience of the weather combining

these with aesthetic analyses of the so called fine weather With its broad scope of inquiry ranging from Aristotle to eco phenomenology from the pioneers of scientific meteorology to contemporary art and from everyday aesthetics to geoengineering this book argues that an aesthetics of weather inflected by greater knowledge and the taking of a critical stance towards aestheticism can become a valuable ally to climate ethics in the Anthropocene
