

FREUD'S THEORY OF PERSONALITY

DEFINITION

Freud's Theory of Personality posits that human behavior is the result of the interactions among three component parts of the mind: the id, ego, and superego. The id operates on the pleasure principle, the ego mediates between the id and reality by acting on the reality principle, and the superego represents our brain's morality.

COMPONENTS

- **Id:** The id operates on instinctual drives and the pleasure principle.
- **Ego:** The ego mediates between desires and reality, seeking practicality.
- **Superego:** The superego enforces moral standards and acts as the conscience.
