business the ruling elite and the liberation movement The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left Yet its objectives are more complex than those of earlier struggles The student movement has challenged the hierarchical top down leadership system of university management and its double speak of professing to act in workers and students interests yet entrenching a regressive system for control and governance University managements while on one level amenable to change have also co opted students into their ranks to create co responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution This book maps the contours of student discontent a year after the start of the FeesMustFall revolt Student voices dissect colonialism improper compromises by the founders of democratic South Africa feminism worker rights and meaningful education In depth assessments by prominent scholars reflect on the complexities of student activism its impact on national and university governance and offer provocative analyses of the power of the revolt

Professor Vuyisile T Msila, Researcher at the Thabo Mbeki African School of Public and International Affairs, University of South Africa. **Transforming Universities in South Africa**, 2020-08-31. The idea of transformation in higher education underpins all policy documents, academic literature and on-going debates in South Africa. *Transforming Universities in South Africa: Pathways to Higher Education Reform* responds to the pressing need to comprehensively review the post-apartheid experience and assess where South Africa's higher education stands across the continent and globally, particularly within the country's efforts to overcome decades of socio-economic imbalances. It addresses the question of whether South Africa's transformation strategy from apartheid to democracy was simply a symbolic new flag-raising and new anthem-singing exercise reflecting a transition akin to those limited decolonization projects elsewhere in the world or whether something more fundamental was possible and was achieved with political and policy implications for other countries in Africa and globally. This volume's ultimate purpose is to provide a basis for imagining new futures in which South Africa's higher education in the context of Africa and the global world takes centre stage. **Cost-sharing and Accessibility in Higher Education: A Fairer Deal?** Pedro N. Teixeira, D. Bruce Johnstone, Maria J. Rosa, Hans Vossensteyn, 2007-11-23. Higher education finances lie at the crossroads in many Western countries. Hence worldwide the most common approach to the need for increasing revenue was to use some form or forms of cost sharing or the shift of some of the higher educational per student costs from governments and taxpayers to parents and students. This raises several important challenges to higher education systems. First, there is the political and social controversy associated with most forms of cost sharing, particularly with tuition fees. Secondly, there are important issues in terms of the broad context of social policy such as the role of families and students and the relationship that the state establishes with each of them. Third, there is the comparison of alternative

instruments of cost sharing and the direct and indirect effects of each of them notably in terms of educational equality
Overall underlying cost sharing debates are fundamental questions about social choice individual opportunities and the role of government in society
