OECD Development Policy Tools Evidence-based Policy Making for Youth Well-being A Toolkit

OECD, 2017-10-17 With 1.2 billion people today's youth population aged 15-24 represents the largest cohort ever to enter the transition to adulthood Close to 90% of these young people live in developing countries and the numbers will practically double in the least developed countries Social Justice and Education in the 21st Century Willie Pearson Jr., Vijay Reddy, 2021-04-10 The world is not an equal place There are high and low income countries and high and low income households For each group there are differential educational opportunities leading to differential educational outcomes and differential labor market opportunities This pattern often reproduces the privileges and inequalities of groups in a society This book explores this differentiation in education from a social justice lens Comparing the United States and South Africa this book analyzes each country's developmental thinking on education from human capital and human rights approaches in both primary and higher education The enclosed contributions draw from different disciplines including legal studies sociology psychology computer science and public policy Discrimination in an Unequal World Miguel Angel Centeno, Katherine S. Newman, 2010-09 Is globalization making our world more equal or less Proponents of globalization argue that it is helping and that in a competitive world no one can afford to discriminate except on the basis of skills Opponents counter that globalization does nothing but provide a meritocratic patina on a consistently unequal distribution of opportunity Yet despite the often deafening volume of the debate there is surprisingly little empirical work available on the extent to which the process of globalization over the past quarter century has had any effect on discrimination Tackling this challenge Discrimination in an Unequal World explores the relationship between discrimination and unequal outcomes in the appropriate geographical and historical context Noting how each society tends to see its particular version of discrimination

as universal and obvious the editors expand their set of cases to include a broad variety of social relations and practices. However, since methods differ and are often designed for particular national circumstances, they set the much more ambitious and practical goal of establishing a base with which different forms of discrimination across the world can be compared. Derived from a broad array of methods, the book draws many important lessons on the new means by which the world creates social hierarchies, the democratization of inequality, and the disappearance of traditional categories. **Financing Higher Education Worldwide**

D. Bruce Johnstone, Pamela N. Marcucci, 2010-06-07. No issue in higher education is as salient or as controversial as finance. As demand for higher education around the world grows, so do the costs associated with it, especially as governments shoulder less of the burden. Tuition fees rise and student loan debt grows. Who pays for these surging costs? Who should pay? D. Bruce Johnstone and Pamela N. Marcucci examine the universal phenomenon of cost sharing in higher education, where financial responsibility shifts from governments and taxpayers to students and families. They find that growing costs for education far outpace public revenue streams that once supported it. Even with financial aid and scholarships defraying some of these costs, students are responsible for a greater share of the cost of higher education. Featuring comprehensive economic and policy data, the authors' international comparative approach shows how economically diverse countries all face similar cost sharing challenges. So, who should pay for higher education? While cost sharing is both politically and ideologically debated, Johnstone and Marcucci contend that for almost all countries it is imperative for the financial health of colleges and universities, bringing better efficiency, equity, and responsiveness. **Financing Higher Education Worldwide** combines sophisticated economic explanations with sensitive political and cultural analyses of the financial pressures facing higher education throughout the world. *Going to University*

Case, Jennifer, Marshall, Delia, 2018-02-09. Around the world, more young people than ever before are attending university. Student numbers in South Africa have doubled since democracy, and for many families, higher education is a route to a better future for their children. But alongside the overwhelming demand for higher education, questions about its purposes have intensified. Deliberations about the curriculum, culture, and costing of public higher education abound, from student activists and academics to parents, civil society, and policy makers. We know from macro research that South African graduates generally have good employment prospects. But little is known at a detailed level about how young people actually make use of their university experiences to craft their life courses. And even less is known about what happens to those who drop out. This accessible book brings together the rich life stories of 73 young people six years after they began their university studies. It traces how going to university influences not only their employment options but also nurtures the agency needed to chart their own way and to engage critically with the world around them. The book offers deep insights into the ways in which public higher education is both a private and public good, and it provides significant conclusions pertinent to anyone who works in and cares about universities. *Going to University.
