

Components of a SOAP Note in Occupational Therapy

Here's what goes into a SOAP note for occupational therapy.

Subjective: Gathering the Patient's Statements, Feelings and Perceptions

Here, you'll document the patient's personal experiences, feelings and perceptions about their therapy. It's about understanding the patient's perspective, concerns and how they're coping with challenges.

Objective: Documenting Measurable, Observable Data

This is your factual account of the therapy session. This includes documenting patient activities, their responses to various interventions, and your direct professional observations. It's a record of what was done, seen, and measured—like the patient's ability to perform certain tasks, their physical responses to treatment, and apparent range of motion when performing certain movements.

Assessment: Professional Interpretation of Subjective & Objective Information

Here, you'll examine the information gathered in the Subjective and Objective sections to make a professional judgment. This includes assessing the patient's progress, identifying any challenges or changes in their condition, and evaluating their response to therapy.

Plan: Detailing Future Therapy Plans, Adjustments in Treatment & Setting Goals

The Plan is the forward-looking component of the SOAP note. It outlines your recommendations for future therapy sessions, adjustments in treatment strategies, and sets short- and long-term goals for the patient.

Handbook of Occupational Therapy for Adults with Physical Disabilities William Sit, Marsha Neville, 2024-06-01. Handbook of Occupational Therapy for Adults With Physical Disabilities by Drs William Sit and Marsha Neville provides quick and essential information for occupational therapists that are new to the adult practice setting. This handbook is primarily organized by body system into six sections: Occupational performance as a whole, Central nervous system, Peripheral nervous system, cranial nerves and sensory system, Musculoskeletal system, Cardiovascular lymphatic, respiratory and integumentary systems, Endocrine, digestive, urinary and reproductive system. At the beginning of each section, you will find a case study based on clinical experience that embodies the chapter subject. Within each section, information is broken down into important aspects of the evaluation process and then followed by the implications of each system on occupational therapy intervention. Handbook of Occupational Therapy for Adults With Physical Disabilities also includes a summary chart where readers can quickly and easily find the purpose, context, form, cost and contact information for each assessment. Handbook of Occupational Therapy for Adults With Physical Disabilities is ideal for occupational therapy students, recent graduates and practitioners who are newly entering an adult physical disability practice setting.
