*Social Foundations of Postindustrial Economies* Gøsta Esping-Andersen, 1999 The Golden Age of postwar capitalism has been eclipsed and with it seemingly also the possibility of harmonizing equality and welfare with efficiency and jobs Most analyses believe that the emerging postindustrial society is overdetermined by massive convergent forces such as tertiarization new technologies or globalization all conspiring to make welfare states unsustainable in the future Social Foundations of Postindustrial Economies takes a second more sociological and more institutional look at the driving forces of economic transformation What as a result stands out is postindustrial diversity not convergence Macroscopic global trends are undoubtedly powerful yet their influence is easily rivalled by domestic institutional traditions by the kind of welfare regime that some generations ago was put in place It is however especially the family economy that hold the key as to what kind of postindustrial model will emerge and to how evolving tradeoffs will be managed Twentieth century economic analysis depended on a set of sociological assumptions that now are invalid Hence to better grasp what drives today s economy we must begin with its social foundations

**How Welfare States Care** Monique Kremer, 2007

Though women s employment patterns in Europe have been changing drastically over several decades the repercussions of this social revolution are just beginning to garner serious attention Many scholars have presumed that diversity and change in women s employment is based on the structures of welfare states and women s responses to economic incentives and disincentives to join the workforce How Welfare States Care provides in depth analysis of women s employment and childcare patterns taxation social security and maternity leave provisions in order to show this logic does not hold Combining

economic sociological and psychological insights Kremer demonstrates that care is embedded in welfare states and that European women are motivated by culturally and morally shaped ideals of care that are embedded in welfare states and less by economic reality

*Postindustrial Germany* Claire Annesley, 2004 This book is about the state of the German model of capitalism today It is the first book to offer an integrated analysis of the political economy of unified Germany rather than dealing with east and west as separate entities It challenges the standard view that Germany is lagging behind other capitalist states in the transition to a postindustrial economy and looks in detail at the expansion of the service sector the transformation of the industrial sector and the development of the knowledge economy in unified Germany The book finds that Germany is indeed becoming postindustrial but that it is not developing in any single direction Rather the research outlined in this book suggests that some regions perform well in services or the production of knowledge while others have successfully transformed industrial production This variation it is argued is the consequence of unification as well as older economic traditions which pre date the industrial revolution
