

Social Work Research Paper

Introduction

The report is based on an interview conducted at a medical social work agency. The primary purposes of this investigation were: to explore the organization and its delivery of services given to the society, and to understand and assess the function of the workers at the medical social work agency. This report attempts to provide a qualitative analysis of the organizational context of the services rendered, and the influences this has on agency practice, standards and functioning. In this study, we will begin with an overview of the agency, then we will look at the necessary avenues of a social worker in the healthcare sector; their roles and responsibilities to their firm and as a worker of the community, and finally the techniques used in the agency for working with the different parts of a community or society. Avenues such as practice and intervention, client population, ethical standards and professionalism in dealing with issues arising within the firm, will be explored. The data was collected via a single interview and thus all data collected and analysed would be assumed as the standard for all social workers in the organization.

An Overview of the Agency

The name of the organization of focus was The Eastern Regional Health Authority (ERHA), located in Mayaro. It was founded in 1994 as an act of parliament and is one of five health authorities in the Republic of Trinidad and Tobago. ERHA is responsible for healthcare in Trinidad's eastern area which consists of places accounting for approximately one-third of Trinidad's land mass. The agency covers from Rio Claro in the south, to Valencia in the east (The Government of the Republic of Trinidad and Tobago, 2018). The organization works in line with the Ministry of Health in Trinidad and Tobago and it functions based on clusters which separate the different areas. The number of health facilities in the different areas will account for the varying of cluster numbers. According to the social worker, the area of research is split into two clusters and this is done throughout the different branches of the organization for easier management. Also, social work in ERHA is divided into two professional groups, psychiatric social workers and medical social workers.

Vision Statement, Mission Statement and Values of the Agency

The vision and aims of the agency are to continuously improve the quality of life for clients by delivering quality health care that is accessible to all. The mission statement and intended actions of the agency are to promote social welfare while collaborating with the community and by focusing on the needs of the population, the agency provides help for members of the community. It allows members of society to obtain several healthcare services that they may not be able to obtain, within the guidelines of national social policy.

The core values of the agency that define their identity and actions are as follows:

Social Work Research Paper:

Pocket Guide to Preparing Social Work Research Articles Bruce Thyer, 2008-02-14 The art of writing up a completed research project in a format suitable for submission to a social work journal is an ability separate from one's skills as a research methodologist. It is also an ability that despite its importance is often overlooked by research courses and senior level mentors. This straightforward pocket guide to Preparing Research Articles steps into the void as an insider's guide to getting published. Drawing on nearly 20 years of experience editing a social work research journal, Bruce A. Thyer has crafted a candid companion to the journal publishing process, unraveling the mysteries that students as well as many established researchers might otherwise stumble over and as a result their prospectus for future success improve. Thyer's frank advice on selecting an appropriate journal, handling rejections and revisions, understanding confusing concepts like impact factors and electronic publishing, and avoiding common methodological and formatting pitfalls constitute a gold mine for the fledgling researcher/writer.

The SAGE Handbook of Social Work Research Ian Shaw, Katharine Briar-Lawson, Joan Orme, Roy Ruckdeschel, 2009-11-27 This is an ambitious book. It aims at nothing less than a comprehensive account of the state of the art of social work research internationally and an intellectually original statement that will help to define and shape social work research. Those with a serious interest in social work research will agree that this is a major undertaking and one that should put social work research on the map. Ian Sinclair, University of York, UK. This terrific Handbook provides an essential map for navigating the complex currents of social work research today. It resists polemical and simplistic binaries to chart a course that emphasizes diversity, pluralism, and sensitivity to political contexts in many featured exemplars. As key chapters note, inherent tensions at the heart of social work itself are mirrored in current debates about the purposes and methods of social work research. Rather than patch over differences, the volume invites us to understand historical roots of unresolvable tensions and live with them. The international scope of the volume is unique: scholars from more than a dozen different countries were involved, and its broad scope counters the tendency toward parochialism of much North American literature. The Handbook should be essential reading for students and academics.

Catherine Riessman, Boston University, USA. The SAGE Handbook of Social Work Research provides a comprehensive internationally focused account of leading social work research, offering an original and defining statement on contemporary theory and practice within the field. The groundbreaking Handbook engages critically with the nature and role of social work research and evaluation in contemporary societies around the globe and asks four key questions: What is the role and purpose of social work research? What contexts shape the practice and purpose of social work research? How can we maximise the quality of the practice of social work research? How can the aims of social work in its varied domains be met through social work research? Ranging over local, national, and international issues and exploring questions of theory and practice, this is a diverse and constructively organized overview of the field. It will quickly be recognized as a benchmark in the expanding field.
