Adolescents In The Internet Age, 2nd Edition Paris S. Strom, Robert D. Strom, 2014-07-01 Teaching adolescents and learning from them is the paradigm elaborated throughout this second edition of Adolescents in the Internet Age The premise is based upon four assumptions 1 Adolescents have unique experiences that qualify them as the most credible source on what growing up is like in the current environment 2 Adolescents are more competent than many adults with tools of technology that will be needed for learning in the future 3 Adolescents and adults can support mutual development by adopting the concept of reciprocal learning and 4 The common quest of adolescents to gain adult identity could be attained before employment Expectations are the theme for every chapter The reason expectations are so important is because they influence goals determine priorities and are used to evaluate progress and achievements of individuals and institutions When teacher expectations correspond with the abilities and interests of students achievement and satisfaction are common outcomes In contrast if teachers expect too little student potential can be undermined There is also concern if expectations

that students have for themselves surpass their abilities This occurs if teachers do not inform students about their deficits Multitasking doing too many things at the same time detracts from productivity Sharing accountability depends upon complimentary and attainable expectations that can be met by students teachers and parents To support appropriate expectations this book for secondary teachers and high school students seeking a broader understanding of their own generation is organized in four parts about aspects of learning and development 1 Identity expectations introduce traditional perspectives on adolescence changes related to sources of learning evolving emphasis of schools and ways to support motivation goal setting and formation of identity 2 Cognitive expectations examine mental abilities academic standards emergence of the Internet as a learning tool development of media literacy creative problem solving and encouragement of higher order thinking skills 3 Social expectations explore the need for giving greater attention to social development importance of teamwork skills involvement with social networking adoption of civil behavior school safety and values as a basis for ethical behavior and character 4 Health expectations center on decisions that influence physical health well being and lifestyle choice Consideration is given to stress management emotional intelligence and risk assessment strategies for individual teenagers and the schools that they attend

Cutchin,Virginia A. Dickie,2012-07-26 An occupation is

most simply put any activity we participate in that engages occupies our attention interests and or expectations at any point throughout the life course This book offers an emerging and innovative perspective on occupation based in the work of American philosopher John Dewey and other pragmatists that challenges accepted ideas Each chapter presents a lively and

multifaceted dialogue on transactional perspectives on occupation. Scholars from Europe, North America, and Australasia have written a diverse set of arguments and case studies about occupation covering theoretical, methodological, and applied issues relevant to the topic. In addition, contributors make connections with significant authors from various disciplines that make clearer the roles of occupation and occupational science across many cultures and contexts. The transactional perspectives articulated in this book both implicitly and explicitly suggest that occupations are forms of activity that create and re-create a multitude of our relationships with the world.
