Globalization and Social Inequality John Chidubem Nwaogaidu, 2013 Globalization tends to promote global homogenization of cultures but its integration processes and interaction systems are hampered by unequal participation governed by the ethos of capitalism This ethos promotes instead individual interests against societal interests As the danger of individualism increasingly constitutes a fundamental community burden it significantly compromises the nation state threatening the social formation and relational outcomes Therefore socially integrated societies with collective initiatives managed by interventionist public institutions with regulative mechanisms and good governance have more potential for equitable development and economic growth This book examines the impact of globalization and social inequality through an analysis of the impact on society in Nigeria Series Sociology Soziologie Vol 80 **The Mirror** Eben C.
