Bateman,Kenneth G.

Willis,2001-11-01 Just as individuals have preferences regarding the various goods and services they purchase every day so they also hold preferences regarding public goods such as those provided by the natural environment However unlike private goods environmental goods often cannot be valued by direct reference to any market price This makes economic analysis of the costs and benefits of environmental change problematic Over the past few decades a number of methods have developed to address this problem by attempting to value environmental preferences Principal among these has been the contingent valuation CV method which uses surveys to ask individuals how much they would be willing to pay or willing to accept in compensation for gains and losses of environmental goods The period from the mid 1980s to the present day has seen a massive expansion in use of the CV method From its original roots in the USA through Europe and the developed world the method has now reached worldwide application with a substantial proportion of current studies being undertaken in developing countries where environmental services are often the dominating determinant of everyday living standards The method has simultaneously moved from the realm of pure academic speculation into the sphere of institutional decision analysis However the past decade also witnesses a developing critique of the CV method with a number of commentators

questioning the underlying validity of its derived valuations This volume therefore reflects a time of heated debate as well as from commentators who see it as an interesting experimental tool regardless of the question of absolute validity of estimates The book embraces the theoretical methodological empirical and institutional aspects of the current debate It covers US European and developing country applications and the institutional frameworks within which CV studies are applied

Sociologies of New Zealand Charles Crothers, 2018-04-13 This book provides the first comprehensive analysis of the various sociologies of New Zealand from the late 19th century to the present day Opening with previously undocumented insights into the history of proto sociology in New Zealand the book then explores the parallel stories of the discipline both as a mainstream subject in

Sociology departments and as a more diffuse sociology within other university units The rise and fall of departments specialties and research networks is plotted and the ways in which external and internal factors have shaped these is explained Different generations of sociologists including many immigrants are each shown to have left their unique mark on New Zealand sociology The author demonstrates that the rising interest in topics specific to New Zealand has been accompanied by increasing capacities to contribute to world sociology This book will have inter disciplinary appeal across the social sciences and provides a valuable study of the development of sociology in a semi peripheral country
