Soft Target Hardening Protecting People From Attack:

Soft Target Hardening Jennifer Hesterman, 2018-12-07 The US government spends billions of dollars to secure strategic and tactical assets at home and abroad against enemy attack. However, as hard targets such as military installations and government buildings are further strengthened, vulnerable soft targets are increasingly in the crosshairs of terrorists and violent criminals. Attacks on crowded spaces such as churches, schools, malls, transportation hubs, and recreational venues result in more casualties and have a powerful effect on the psyche of the populace. *Soft Target Hardening: Protecting People from Attack, Second Edition* continues the national dialogue started by the first edition by providing case studies, best practices, and methodologies for identifying soft target vulnerabilities and reducing risk in the United States and beyond. Soft target attacks steadily climbed in number and scale of violence since the first edition of this book. New tactics emerged as terrorists continually hit the reset button with each attack. In this volatile, ever-changing security environment, plans to protect people and property must be fluid and adaptable. Along with new hardening tactics such as the use of tactical deception to disguise, conceal, and divert, the author has updated the text with new case studies to reflect and respond to the fast-moving transformation in methods from more complex and organized forms of terror to simpler yet still devastating approaches. This book is a must-read for those who secure, own, and operate soft target facilities and for citizens who want to protect themselves and their families from attack. *Soft Target Hardening, Second Edition* was named the ASIS International Security Industry Book of the Year in 2019.

Soft Target Protection Ladislav Hofreiter, Viacheslav Berezutskyi, Lucia Figuli, Zuzana Zvaková, 2020-03-03 This proceedings volume includes articles presented during the Advanced Research Workshop on Soft Target Protection. The book presents important topics related to the protection of vulnerable objects and spaces called soft targets. The chapters published in this book are thematically assigned to the blocks as follows: Theoretical aspect of soft target protection; Blast resistance of soft targets; Counterterrorism; Technical and technological solutions for soft target protection; Scheme and organizational measures; Blast protection and Forces for soft target protection. In this book, the reader will find a wealth of information about the theoretical background for designing protection of soft targets as well as the specifics of protecting objects in armed conflict areas. New methods and procedures applicable to the soft target protection are described.

CPTED and Traditional Security Countermeasures Lawrence Fennelly, Marianna Perry, 2018-04-17 CTPED and Traditional Security Countermeasures 150 Things You Should Know is a handy reference for both seasoned professionals and those just starting out in security and law enforcement Crime Prevention Through Environmental Design CPTED is a foundational concept to physical security and can be incorporated widely in security policies plans and procedures It has proven effective over the many years insofar as building and campus

design security architecture and creating an overall security culture in any workplace The authors have collected a broad array of topics together garnered through their many years of real world experience in the field Security solutions that address a wide range of physical security challenges are presented in an easy to follow format Security practitioners and law enforcement professionals alike will find practical tips to understand and manage their security program including access control target hardening command and control physical security protections and visitor management among a myriad of other topics This will be a must have reference for professionals looking for real world recommendations for physical security solutions Enhancing Security, Sustainability and Resilience in Energy, Food and Water Marko Keskinen, Suvi Sojamo, Olli Varis, 2020-03-10

This book looks at the ways that energy food and water help to create connections between sustainability and security The concept of security is in our current societies increasingly connected with sustainability which seeks to ensure that we as humans are able to live and prosper on this planet now and in the future The concepts of energy security food security and water security used separately or together manifest the burgeoning linkages between security and sustainability This book brings together ten scientific articles that look at different aspects of security sustainability and resilience with an emphasis on energy food and or water in the context of Finland and Europe Together the articles portray a rich picture on the diverse linkages between both energy food and water and between security and sustainability In sum the articles and related preface conclude that ensuring sustainable security or secure sustainability requires systemic structured processes that link the policies and actors in these two important but still distant fields **Holy Wars and Holy Alliance**

Manlio Graziano, 2017-04-11 Religions are reemerging in the social political and economic spheres previously occupied and dominated by secular institutions and ideologies In the wake of crises exposing the limits of secular modernity religions have again become significant players in domestic and international politics At the same time the Catholic Church has sought a holy alliance among the world s faiths to recentralize devout influence an important albeit little noticed evolution in international relations Holy Wars and Holy Alliance explores the nation state s current crisis in order to better understand the religious resurgence s implications for geopolitics Manlio Graziano looks at how the Catholic Church promotes dialogue and action linking world religions and examines how it has used its material financial and institutional strength to gain power and increase its profile in present day international politics Challenging the idea that modernity is tied to progress and secularization Graziano documents the return or the revenge of God in all facets of life He shows that tolerance pluralism democracy and science have not triumphed as once predicted To fully grasp the destabilizing dynamics at work today he argues we must appreciate the nature of religious struggles and political holy wars now unfolding across the international stage Security and Risk Assessment for Facility and Event Managers Stacey Hall, James M. Lockdown Drills Jaclyn Schildkraut, Amanda B. Nickerson, 2022-09-06 A comprehensive resource on what lockdown drills are why they are necessary and how best to conduct them The first book to offer a comprehensive examination of lockdown drills in K 12 schools *Lockdown Drills* balances research findings with practical applications and implications Schildkraut and Nickerson school safety experts with complementary backgrounds in criminology and school psychology review the historical precedents for lockdown drills distinguish school lockdowns from other emergency procedures such as active shooter drills explain why they are conducted present evidence based research on their effectiveness and describe how to conduct them according to best practices Proponents of lockdown drills as a life saving necessity the authors help to bring much needed standardization to how these drills are studied and conducted The authors present common arguments for and against the inclusion of lockdown drills in emergency preparedness efforts balancing their discussion of the perceptions and psychological impacts of lockdown drills with scholarly research on the extent to which lockdown drills improve how effectively individuals respond to a potential threat Placing lockdown drills in the larger context of school safety and preparedness they examine the broader implications for policymakers Finally they emphasize that drills of which lockdowns are only one type are just a part of the complex school safety puzzle Ensuring that schools are safe places for students and educators begins long before a crisis occurs and continues through the days weeks and years of recovery

following a crisis **Community Engagement Best Practices Across the Disciplines** Heather K. Evans, 2017-11-15 This book is a reference to administrators and educators at institutions of higher learning who are thinking about taking serious steps to link their educational mission to helping their surrounding communities Various best practices across the disciplines in higher education about integrating community engagement in traditional coursework are presented This book provides a multi disciplinary and multi method approach to incorporating the effects of community engagement service learning in the curriculum Multiple departments from Art to Statistics as well as various types of classes undergraduate graduate online face to face are represented here If you are not sure how to integrate community engagement in classes at your university this book is for you *Disaster Management* C.A. Brebbia, 2018-01-30 Recent major earthquakes tsunamis hurricanes floods and other natural phenomena have resulted in huge losses in terms of human life and property destruction A new range of human made disasters have afflicted humanity in modern times terrorist activities have been added to more classical disasters such as those due to the failure of industrial installations It is important to understand the nature of these global risks to be able to develop strategies to prepare for these events and plan effective responses in terms of disaster management and the associated human health impacts The selected papers contained in this book have been written by academics and professionals and represent some of the latest developments in the field **An Introduction to Operational Security Risk Management** Dr. Tony Zalewski, 2019-01-09 This introductory book provides a sound foundation for operational security risk practitioners as well as others with an interest or responsibility for security in our rapidly changing and often unpredictable global environment It is not intended as an alternative to specialised texts on security issues but rather as a supplement to theoretical perspectives and practical guidelines including standards on the subject As the nature and character of risk in the modern world continues to evolve and present new and unanticipated challenges there is a need for innovative approaches to protective security that focus on the operational level where risks impact most upon people as well as the information systems property and general business and community activities that define their everyday lives This book makes an important contribution to this goal Security related risks are an unavoidable part of day to day life and need to be treated seriously by all organisations regardless of size or location But as the late German sociologist Ulrich Beck observed in his seminal work on the contemporary nature of risk *World Risk Society* in the modern world risk and responsibility are intrinsically connected Therefore although risks can be categorised under any number of headings such as personnel property technological legal regulatory financial and reputational what is ultimately needed by those tasked with the responsibility of managing risk is a framework that acknowledges the fluidity of risk but at the same time places human activity as the focal point of mitigation efforts Dr Tony Zalewski s book makes an important contribution to this goal *Children Born of War* Sabine Lee, Heide Glaesmer, Barbara Stelzl-Marx, 2021-07-28 This volume presents research from an international interdisciplinary and intersectoral research project in which 15 doctoral researchers explored a range of

issues related to the life course experiences of children born of war in 20th century conflicts Children Born of War CBOW children fathered by foreign soldiers and born to local mothers during and after armed conflicts have long been neglected in the research of the social consequences of war Based on research projects completed under the auspices of the Horizon2020 funded international and interdisciplinary research and training network CHIBOW www.chibow.org this book examines the psychological and social impact of war on these children It focusses on three separate but interrelated themes firstly it explores methodological and ethical issues related to research with war affected populations in general and children born of war in particular Secondly it presents innovative historical research focussing specifically on geopolitical areas that have hitherto been unexplored and thirdly it addresses from a psychological and psychiatric perspective the challenges faced by children born of war in post conflict communities including stigmatisation discrimination within the significant context of identity formation when faced with contested memories of volatile post war experiences The book offers an insight into the social consequences of war for those children associated with the enemy by virtue of their direct biological link
