He shows how to visualize the impact of how flows connect over a range of circumstances. You also need to be aware of how you respond to many different signals that appear, pushing and pulling the lesson plan. Appropriate for teachers of all grade levels and subject areas, the book provides teaching scenario prompts for you to practice playing all the parts through self-observation and opportunities for you to diagram your own teaching. As you work through the pages, you'll be able to visualize your performance the way athletes do, becoming more in tune with yourself. With this book as your batting cage, you will be increasing your impact on students in no time.
