Ed Dorothy U. Seyler, 2002 *Physics of the Solar System* B. Bertotti, P. Farinella, D. Vokrouhlicky, 2012-12-06 This book is a direct sequel to B Bertotti and P Farinella Physics of the Earth and the Solar System Dynamics and Evolution Space Navigation Space Time Structure Kluwer Academic Publishers 1990 Nearly 15 years after its publication it became evident that the volume was in need of a new edition to keep up with the outstanding progress and the changing perspectives in this field David Vokrouhlicky agreed to collaborate on the project and be the third author On March 25 2000 after a long illness and a heart transplant Paolo Farinella passed away We then decided that rather than aiming at a second edition it made

more sense to rewrite the book anew While its basic content and the structure of the chapters are the same important new topics have been added including the extrasolar planetary systems transneptunian objects accurate determination of reference frames and new space projects Greater relevance has been given to semiquantitative discussions before introducing formal developments many figures have been added and updated and several errors corrected More emphasis has been given to the solar system whereas geophysical topics have been left at a less advanced level To mark this change the slightly different title *Physics of the Solar System* was chosen We wish to dedicate this book to the memory of Paolo Farinella an outstanding scientist an invaluable collaborator and a dear friend

Voices from the Classroom: A Celebration of Learning Vana Chiou, Lotte Geunis, Oliver Holz, Nesrin Oruç Ertürk, Fiona Shelton, 2021 *Voices from the Classroom* illustrates that teachers have a leading voice in the policies that impact their students and the profession of teaching The aim is to provide a rich and broad view of the impact of inquiry in the classrooms from primary to higher education and to provide a window into the perspective of teachers *Voices from the Classroom* allows us to advance this mission by identifying and then turning educators' ideas into action The publication includes chapters on issues ranging from dyslexic students' geospatial abilities to teachers' differential behaviours related student characteristics and the experiences of refugees with bullying in the educational space All the contributions published in this book emerged from real classrooms our teachers and researchers conducted their research by drawing on their experience as educators We believe that these insights into everyday classrooms and the issues affecting them are crucial to making teaching and learning better We hope they can help drive real positive change for students and teachers
