Language Teaching Thomas H. Schmidt, Laura Torres-Zúñiga, 2017-06-23 This volume explores how the traditional academic disciplines of linguistics translation literature and cultural studies can contribute to or be integrated into the teaching of a foreign language by means of innovative methodologies techniques and instruments The book begins with a selection of essays on applied linguistics that share some significant findings in the context of second or foreign language acquisition It then examines the ways in which linguistics translation theory literature and cultural studies are brought into the foreign language classroom not just as objects of study but also as vehicles for language learning By presenting studies on four main foreign languages English Spanish French and German the collection offers to the foreign language profession an opportunity for the sharing and comparison of strategies across languages at both the secondary and higher education level The text is a valuable resource for language teachers with a more philologically oriented background who would like to learn how to apply their research knowledge and experience to the design and implementation of new methodological approaches
