Allen,Nicolas M Botton,2019-05-15 A well functioning financial management information system FMIS provides timely
reliable and comprehensive reports that support implementation of the government s fiscal policies and fiscal rules and the
formulating controlling monitoring and executing of the budget The architecture of FMISs has undergone a transformation
since these systems were first developed in the 1980s Rather than attempting to cover all or most public financial
management PFM functions many FMISs now focus on a few core functions such as accounting and reporting budget
execution and cash management Yet a survey of 46 countries shows that many face severe challenges in transforming their
FMIS into an effective tool of fiscal governance These challenges relate to weaknesses in the system s core functions its
institutional coverage the information technology platforms it uses and the ease of sharing data with other IT systems This
How to Note discusses how to address these chal lenges Replacing an FMIS with an entirely new system may not be an
optimal strategy By utilizing the latest technology a better approach may be to update or replace one or more core modules
of the system the so called modular approach Implementation of an effective FMIS however depends on two critical
preconditions strong political motivation and commitment and the system s ability to meet ongoing and anticipated PFM
needs
