presents an argument for the importance of circulation in the study of museum collections past and present It brings
together an impressive array of international scholars and curators from a wide variety of disciplines including the history of
science museum anthropology and postcolonial history to consider the mobility of collections The book combines historical
perspectives on the circulation of museum objects in the past with contemporary accounts of their re mobilisation notably in
the context of Indigenous community engagement Contributors seek to explore processes of circulation historically in order
to re examine inform and unsettle common assumptions about the way museum collections have evolved over time and
through space By foregrounding questions of circulation the chapters in Mobile Museums collectively represent a
fundamental shift in the understanding of the history and future uses of museum collections The book addresses a variety of
different types of collection including the botanical the ethnographic the economic and the archaeological Its perspective is
truly global with case studies drawn from South America West Africa Oceania Australia the United States Europe and the UK
Mobile Museums helps us to understand why the mobility of museum collections was a fundamental aspect of their history
and why it continues to matter today Praise for Mobile Museums This book advances a paradigm shift in studies of museums
and collections A distinguished group of contributors reveal that collections are not dead assemblages The nineteenth and
twentieth centuries were marked by vigorous international traffic in ethnography and natural history specimens that tell us
much about colonialism travel and the history of knowledge and have implications for the remobilisation of museums in the
future Nicholas Thomas University of Cambridge The first major work to examine the implications and consequences of the
migration of materials from one scientific or cultural milieu to another it highlights the need for a more nuanced
understanding of collections and offers insights into their potential for future re mobilisation Arthur MacGregor *Critical
Issues in Tourism Co-Creation* Giang Thi Phi,Dianne Dredge,2021-07-05 Co creation is fast becoming a buzz word in tourism
Traditional approaches to value creation in tourism suggest that operators and suppliers produce goods and services which
are consumed by tourists The value produced is usually measured in economic terms Co creation challenges these
assumptions arguing that tourism producers and consumers co create value together and that this value is more diverse than
just economic value Technologies underpinning social media ratings and review tools and e commerce are facilitating the
creation of diverse values and have been responsible for driving innovation in for example new business models such as the
collaborative economy Social environmental emotional reputational and other kinds of value may also be produced and a
wide range of stakeholders not just producers or consumers might also benefit from the value co creation process This edited
volume seeks to go beyond the dominant business management marketing perspectives that focus on the co creation of

market value and innovation to excavate complex and critical episodes of co creation in tourism By engaging authors from both the academy and beyond it explores the rich historical lineage of co creation and its contemporary practices The chapters in this book were originally published in Tourism Recreation Research
